I would like to share with you and everyone in your organization what is quickly becoming one of the most crucial issues of our times: Chemtrails.

Chemtrails are persistent jet engine trails that contain barium, aluminum, arsenic, strontium and a host of other pathogenic bacteria, viruses and fungi. We are literally being poisoned from the sky daily. Just look up in the sky and you will see the evidence. There are NOT contrails... contrails dissipate as the aircraft moves. Chemtrails are persistent, expand and stay in the atmosphere for days until all those chemicals reach the earth.

Many people are becoming sick with upper respiratory problems from the host of chemicals and viruses in these chemtrails. Whole ecosystems are dying because of them. An excellent documentary on chemtrails is:

<http://www.youtube.com/watch?v=7C5TFTkblKQ&feature=youtu.be>

The persistent cloud cover is preventing our crops from growing which need direct sunlight... we are headed for famine if this continues... since NOTHING will grow under heavy aluminum toxicity and lack of sunlight.

This is a direct assault on humanity and the entire planet. Please consider this urgent issue seriously, share with as many people as you know and take action to protest this activity before it is too late.

The excuse given by the US govt is weather modification, but this is a lie in order to hide the true intention: massive reduction in population.

It has been apparent that the weather in recent years has been very erratic: chemtrails are to blame. If chemtrails continue they will, according to scientists, cause irreversible damage to the earth, its soil and its oceans with highly unpredictable results which may mean unprecedented global disasters.
