

Dear Madam / Sir:

Knowing that you are fully aware of the weather modification cover up and the disinformation regarding chemtrails in the mainstream media, I would like to remind you that ignoring the oath sworn upon accepting your responsibilities is legally and lawfully defined as treason. In the case of chemtrails, it would be high treason.

Physics dictates that particulates sprayed at any altitude must fall to ground, therefore, because the public has not been told:

- What is being sprayed?
- When?
- Where?
- What are the expected consequences?
- What must the public do to safeguard their personal, family, friends and pets health?
- Most importantly, why?

As any amount of research into chemtrails demonstrates:

- Chemtrails are a global operation
- The amount of and quality of light we receive has been reduced by 20% since spraying began
- Aluminum testing shows levels thousands of times over the legal and lawful levels

Considering the cost of this operation, shouldn't the public be informed about the amount of money is being diverted to corporations who are spraying that public without their knowledge or consent?

There are many laws being broken at the moment. The public generally expects that the military and police enforce these laws when corrupt officials are in office. Now that you are aware of many crimes being committed, and that these crimes are being carried out on you, your family, we ask that you execute justice.

As a Police officer it is your duty to investigate and bring criminal charges against all those carrying out such environmental, genocidal, and behavior modification crimes. Failure to do so is high treason. Claiming there is no legislation to deal with geoengineering is not an excuse, as many other laws can be used. Failure to act is a failure to protect. It is provable in a court of law that we are being sprayed daily since 1998 (although weather modification and biological warfare experiments have been carried out since the 1920's), hence those particulates have been falling on you, me and everyone else. You have now been informed.

Thank you for upholding your oath and being there to protect the people.
