U.S. Senator
Washington, DC 20510

Honorable Senator (Name),

The problem I'm writing to you about is happening in (Your State) and all across our nation. Due to the serious nature of the problem, I am requesting that you assign someone on your staff to look into this matter as soon as possible. Aerosol spraying, known as Chemtrails, has increased at an alarming pace and the chemicals being sprayed are Toxic. Daily, planes are spraying highly toxic chemicals and it's happening in every state and even internationally. In fact if "YOU" look at the skies you will see that almost daily we are being bombarded with Chemtrail spraying. The planes leave a white trail (similar to a contrail) that lingers and sometimes expand until they cover the entire sky with a white hazy film. These are NOT contrails which dissipate quickly. Who is behind this spraying and Why are they doing it?

It's been documented that the chemicals being sprayed contain Aluminum Oxide and Barium salt. Both are known to be harmful to humans, vegetation and wildlife. Both are now at levels in our water & soil that are over a 1000 times higher than what is acceptable. It's been documented that in proportion to the increase in this toxic spraying, there is an increase in Alzheimer, liver disease, Meningitis, Asthma, bronchitis, pneumonia, other breathing disorders and illnesses. Just this week, it was reported there is an increasing level of Toxic chemicals in pregnant women. Children and seniors seem to most susceptible.

In addition it's reported that tens of thousands of trees are dying. Our water and soil is being contaminated and food crops are declining in quality and quantity. This poisoning of our water, air, and soil has contaminated our food chain and eco system which will lead to massive food shortages.

Please assign someone on your staff to thoroughly research Chemtrails and Geo-engineering (weather modification) and to report back to you. I'm confident your findings will leave you no choice but to take the necessary action to ban this aerosol spraying in (your state). Surprisingly, few people look up at the skies but everyone who becomes aware of the spraying knows that whatever it is that's happening, it's NOT normal. Senator, your response to this request is greatly appreciated.

Respectfully,
