My First Experience with Chemtrails

- Insert your story here

History

- First widely-known chemical spraying in Vietnam
- Public Observations:
 - Late 90's and early 2000's: Increased sightings of jet trails in the sky
 - Early 2005 – Massive daily sighting in countries across the world

Observations

- Spraying often concentrated in high population areas
 - Flu-like symptoms, respiratory infections, general immune suppression
 - Numerous other illnesses coincide with heavy spraying
- Heavy spraying over agricultural areas
 - Reduced plant-mineral uptake
 - Stunted plant growth
 - Reduced fruit/vegetable production
- Heavy spraying in areas that influence weather, such as off the coast of California
 - Increased frequency of weather anomalies & dramatic weather
 - Many broken temperature records
 - Vast & rapid temperature swings
 - Storms without precipitation; clouds move through but no rain/snow
- Atmospheric conductivity often 4-times higher than normal
 - Caused by increased metal ions (charged particles) in the air
 - Increased frequency of lightning strikes

Testing

- People began testing soil, rain water, dust
- **Mount Shasta, California Rainwater & Snowwater:**
 - Consistently finding elevated aluminum, barium, and strontium
 - Aluminum:
 - Normal is considered 0.5 ug/L (micrograms per liter) for rainwater
 - Maximum allowed in drinking water: 50 ug/L
 - Government action is required for drinking water at 1000 ug/L
 - In spring 2006 – 7 ug/L in rainwater
 - In 2010: Consistently hovering around 1010 ug/L, found as high 3450 ug/L
 - This test is repeatable and has been performed dozens of times now
 - Snow in Mt. Shasta: 61,600 ug/L
 - Strontium: 383 ug/L
 - Barium: Tests show 8 ug/L, 83 ug/L
 - pH: 50 pH tests show 10-times more alkaline than normal (aluminum shifts towards alkaline)
- **Phoenix, Arizona Air Tests, 2008** (known to be very heavily sprayed)

- Collection Method: Filtered air for 4 hours during the day and 4 hours after sunset for 28 days. Lab method used was "ICP Scan, Inorganic Analysis".
- Barium: 558,000 ppb (parts per billion), 278 times over the toxic limit
- Copper: 197,000 ppb, 98 times over the toxic limit
- Manganese: 552,000 ppb, 5,820 times over the toxic limit
- Zinc: 593,000 ppb, 593 times over the toxic limit
- Cadmium: 1,260 ppb, 126 times over the toxic limit
- Chromium: 28,200 ppb, 282 times over the toxic limit
- Nickel: 33,800 ppb, 169 times over the toxic limit
- Aluminum: 12,809,000 ppb, 6,400 times over the toxic limit
- Iron: 16,800,000 ppb, 28,000 times over the toxic limit
- Magnesium: 10,600,000 ppb, 5.3 times over the toxic limit
- Potassium: 7,930,000 ppb, 793 times over the toxic limit
- Sodium: 6,370,000 ppb, 15.9 times over the toxic limit
- **Bangor, Maine Rainwater Tests, 2011**
 - Aluminum: 300 ug/L (0.5 ug/L considered normal)
 - Barium: 5.8 ug/L
 - Mercury: 0.2 ug/L
 - Chromium: 15 ug/L
 - Lead: 5 ug/L
 - Thallium: 15 ug/L
- **Gainesville, Florida Rainwater Tests, August, 2011**
 - Aluminum: 197 ug/L (0.5 ug/L considered normal)
 - Barium: 28.5 ug/L
- **Wheeling West Virginia, September, 2012**
 - Aluminum: 12.9 ug/L (0.5 ug/L considered normal)
 - Barium: 125 ug/L
- California Insects:
 - California insect tests show a decrease from 1000 bugs to 30 bugs per unit of area
 - California Trout showing dramatic decreases in stomach food (insects)
- Are the metal aerosols coming from China? No! California Air Quality Resources Board (CARB) studied Chinese aerosols and showed no metals among them.
- People around the world have received blood tests and are showing elevated barium and aluminum levels.
- There are now hundreds of tests around the world showing elevated aluminum, barium, and strontium in rainwater, dust, and soils.
- White Bark Syndrome: Tree bark turns white. Tests show extremely high aluminum levels in this bark. The trees soon die.
- White nose syndrome: Bat get white noses and then die from what appears to be chronic immune suppression; a well known side effect of aluminum, barium, and mercury.

Government Involvement & Admissions

- Government scientists have publicly proposed dumping 10 to 20 million metric tons of aluminum into the atmosphere at conferences all over the world
- Government denies that they are currently spraying, yet we are seeing the environmental damage that exactly matches what we would expect from this aluminum spraying.
- **U.S. Depopulation Policy:**
 - National Security Study Memorandum 200, also known as "*The Kissinger Report*"
 - Written in 1974, Declassified 1989, about 130 pages
 - Objectives:
 - Growth Reductions Targets:
 - 500,000 reduction by 2000
 - 3 billion reduction by 2050

- Create conditions to decline fertility rates
- Use food to control growth in third world countries
- **Rockefeller family**, largest controller of pharmaceutical and oil industries
 - Family founded United Nations as a "Permanent World Capitol" in New York City
 - John D Rockefeller III, founds Population Council in 1952.
 - **Frederick Henry Osborn**: First President of the Population Council; was appointed by J.D. Rockefeller III.
 - Osborn helped found the *American Eugenics Society* (now called "Society for the Study of Social Biology")
 - Quote from Osborn's book *The Future of Human Heredity* (1968):
 - *"Eugenic goals are most likely to be attained under another name than eugenics."*
 - Osborne's nephew, Henry Fairfield Osborn, continued to propel the philosophy of population control. Quote from his book *"Our Plundered Planet"* (1948):
 - *"Many things can happen to check population growth even including the devastating use of atomic bombs in a new war. ... The problem of...increasing populations...cannot be solved in a way that is consistent with humanity".*
 - Frank W. Notestein, appointed by Rockefeller as next President of the Population Council. Also appointed to the United Nation's population division. Quote from his paper entitled "The Problem of Population Control":
 - *"...governments must go beyond voluntary family planning. ...The price for this type of population control may very well be the institution of a totalitarian regime."*
- **Patents for Chemtrail Creation Devices**
 - Hundreds of patents exist that are related to the creation and dispersion of chemical aerosols into the atmosphere both from the air and from the ground.
- **Toxic Metallic Powders Imported To Air Force Bases**
 - Whistleblower Kristen Meghan: Job: Bio-Environmental Engineering
 - She was responsible for approving hazardous materials brought onto base.
 - She began seeing Material Safety Data Sheets (MSDS) for canisters of carcinogenic metals, oxides, and powders.
 - 2007-2008: Tested her off-base residence. Found barium and aluminum in soils.
 - metallic powders of barium and aluminum.

Disinformation

- Government and mainstream media are working together to convince the public that chemtrails are water vapor
- Numerous animated cartoons and movies now feature jet trails on a regular basis
- This process of getting the public used to something new is called "Normalization"
- Children in the U.S. Are receiving worksheets and assignments to go outside and count the number of jet trails they see. They are being told these are contrails.
- NASA has produced cloud charts used to convince schoolchildren that chemtrails are water vapor
- Ex-military personnel have been offered positions managing companies where 200 people sit in a room in front of computers and produce websites, Facebook accounts, and blogs designed to convince the public that chemtrails are contrails
- These same groups also infiltrate chemtrail activism groups and attempt to stir up discord among members
- In 2011, Hillary Clinton asked Congress for hundreds of millions of dollars for additional funding for disinformation programs. She said it was for use against foreign countries.

Health

- **Aluminum**
 - Symptoms
 - Inflammation, which leads to numerous other diseases and condition
 - Long-term exposure to aluminum oxide suppresses the ability of white blood cells (Macrophages) in the Alveoli (the tiny air sacks in the lungs) to engulf germs through a process called "phagocytosis".
 - Neurodegenerative diseases, including Alzheimer's dementia, Parkinson's disease and Lou Gehrig's disease (ALS) are strongly related to exposure to environmental aluminum
 - Nanoparticles of aluminum easily penetrate the brain by a number of routes, including the blood and olfactory nerves (the smell nerves in the nose)
 - Detox/Solutions
 - Malic Acid – Most effective way to detox aluminum
 - Pectin – Helps remove aluminum from digestive system
- **Barium**
 - Symptoms
 - Suppressed immune system, muscle weakness, muscle tremors, 3. Stomach irritation, diarrhea, trouble breathing, anxiety, irregularities heartbeat, spiking blood pressure, rapid heartbeat, paralysis
 - Can dramatically lower potassium inducing heart palpitations and heart attacks
 - Detox/Solutions
 - Supplement with potassium to keep levels safe. Limit 1800 mg per dose.
 - Supplement with Taurine (amino acid) to help the heart maintain electrolytes (potassium, magnesium, calcium, phosphate)
 - Supplement with Algin to help reduce barium uptake in the digestive system
- **Strontium**
 - Symptoms
 - Interferes with calcium metabolism; is deposited in the bones
 - Can elongate bones leading to connective tissue pain/inflammation
 - Costochondritis
 - Detox/Solutions
 - Supplement with Algin to help reduce strontium uptake in the digestive system
 - Supplement with calcium to offset strontium uptake
- **Mercury**
 - Symptoms
 - Causes over 200 of the most common diseases
 - Causes numerous emotional symptoms like depression, anxiety, poor memory, racing thoughts, difficult concentrating, rage, insomnia/poor quality sleep,
 - Detox/Solutions
 - DMSA or DMPS (strong detox)
 - Reduced Glutathione
 - N-Acetyl Cysteine (glutathione precursor)
 - Supplement with Algin to help reduce mercury uptake in the digestive system

Activism

- Once it was established that toxins were being sprayed, groups began forming globally

- Now there are hundreds of websites and blogs covering this subject
- Numerous secondary news sources of have covered chemtrails

How To End The Spraying

- The 5-Step Plan:
 - **Expose** - We need to gain public support to stop chemtrails. To do this, we must expose chemtrails to the public. Once the public is aware of this activity, we will have the support we need to continue to step 2.
 - **Oppose** - Once we have the public support we need, we must oppose all chemtrail spraying activity using a class action lawsuit. Once we oppose chemtrails this way, we can set a precedent so others can sue so spraying will stop.
 - **Enact** - Once a lawsuit is underway, we must work to enact laws and enforcement penalties that will prevent chemtrail spraying. By enacting legislation with teeth, we will have the force of law we need to stop spraying.
 - **Enforce** - Once laws are enacted, they must be enforced. Those guilty of crimes against humanity—such as chemtrail spraying—must be brought to justice.
 - **Prevent** - Once laws against chemtrail spraying are enforced, mechanisms must be put in place to prevent such diabolical actions from ever being carried out again. Public oversight committees, laws requiring openness about military operations, and military regulations must be enacted so as to provide a brick wall against any future attacks against the public.
