Activists Testify at the Environmental Protection Agency in Washington DC

EPA Panel. Getting paid to ignore deeper truths.

After great success exposing weather manipulation and ongoing climate engineering being a [lesser known cause of climate change](#) with accompanying negative health and environmental side effects at the Paris Conference, (See our [Paris report here](#)) Max Bliss and Patrick Roddie pushed on to influence US legislature and joined fellow activists, Jim Lee, creator of [Climate Viewer](#) Michael Saraceno and Amanda Baise, in Washington DC on August 11th 2015.

They all made brilliant groundbreaking testimonies at the Environmental Protection Agency during a [public hearing](#) titled "A Proposed Finding That Greenhouse Gas Emissions from Aircraft Cause or Contribute to Air Pollution That May Reasonably Be Anticipated to Endanger Public Health and Welfare

Max Bliss and fellow activists delivered truth and testimony.

hydrofluorocarbons, perfluorocarbons, and sulfur hexafluoride. This is blatant institutionalized ignorance at its worst: airplanes produce a wide variety of pollutants, not just six greenhouse gasses. Several of these pollutants — like lead, aluminum, and barium — pose a much more direct threat to public health and welfare than non-toxic substances like CO₂.

What You Can Do NOW-

Please Send The Directive to Ban Geoengineering to the EPA in Washington DC.

It's not just for people in the US- people world wide can comment..the atmosphere has no boundaries!

Have your voice heard to influence the law pertaining to jet emissions and

aerosol injection induced cloudiness.

EPA Panel: Lesley Jantarasami Brian Manning

We heartily encourage you to submit your comment to the EPA in Washington D.C. via Email and backed up snail mail by Aug 31st to make sure it is received.

We received word via EPA's Lucy, a receptionist @ +1 734 214 4850 who stated, "there is a software problem and over 20,000 comments are in a limbo because of it."

PLEASE KEEP COMMENTING!

Submitting Comments

The deadline is 31st August, 2015.

Please ensure you include the reference "**Docket ID No. EPA-HQ-OAR-2014-0828-0001**" in your correspondence and submit by one (or preferably more) of the following methods:

- By [completing the form on this regulations.gov page](#). (And you can [view the existing online comments here](#).)
- By [emailing the Environmental Protection Agency](#).
- By snail mail – to *EPA Air and Radiation Docket and Information Center (6102T), 1200 Pennsylvania Avenue, NW Washington, DC 20460, United States of America.*
- By hand – to *EPA West building, EPA Docket Center (Room 3340), 1301 Constitution Avenue, NW Washington, DC 20460, United States of America.*

Please include [The Directive to Ban Geoengineering](#) (either by pasting this link – cpuk.org/mp – or by [downloading the Directive](#) and attaching it to your email / form submission) along with your comments.

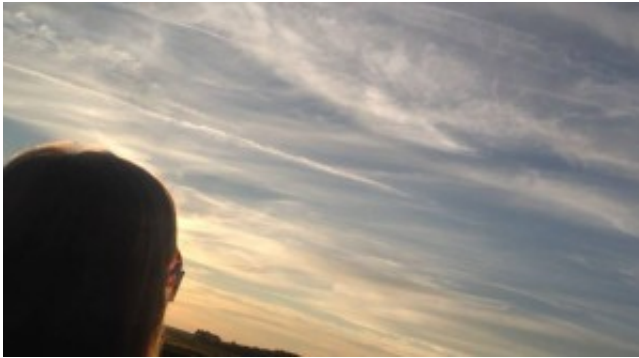

Additionally, including our [Climate Change Sense document](#) or a link to the Climate Change Sense website – ClimateChangeSense.org – will help highlight the fraudulence of the IPCC's underlying claims.

TIPS FOR SUBMITTING EFFECTIVE COMMENTS-

to stop it. c) keep them informed on what GE (Geoengineering) is for, *but don't necessarily ask their permission.*

[The Washington Times](#) wrote an article of the hearing and critics said “Mr. Obama, deeply concerned with securing his place in history as the first U.S. president to truly address climate change, is meddling unnecessarily in an industry that has demonstrated its ability to get cleaner without government interference.

“Such regulations would increase the price of airfare for Americans and harm our domestic carriers. Over the last fifty years, the fuel efficiency of jetliners has increased by 70 percent,” said Rep. Lamar Smith, Texas Republican and chairman of the House Science, Space and Technology Committee. “Incentives are already in place to make air travel more energy efficient. This proposal is the next leg of a nonstop journey by the [EPA](#) to control how Americans live, work and travel.”

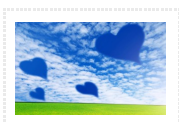

And fellow activist [Terry Lawton](#) commented, the article “failed to mention the testimonies given by [Amanda Baise aka Madison Star Moon](#), [Patrick Roddie](#), [Jim Lee](#), [Max Bliss](#) and [Michael Sarenceno](#), which accounted for 40% of the testimonies given on the day. All of their brilliant testimonies it seems to have fallen on deaf ears, this is an absolute outrage and totally unacceptable. So its up to every activist out there to get this out on social media as best we can. All of these dedicated and passionate anti climate engineering activists put alot of hard work and preparation into their efforts on behalf of humanity. Please share far and wide.”

Reminder: The deadline to submit your comments to the EPA is 31st August, 2015.

Please realise how important it is that every person concerned about this issue raised by our [“Warriors of The Deep Blue Sky.”](#) write your concerns to the EPA and share, share, share this info with friends and family through your email lists too. Thank you!

First of all well done to everyone for exposing and bringing to light the serious problems with chemtrails and geo-engineering. I intend to watch every one of these videos and read the articles, sounds like a great deal of information was given.

As for the EPA it just sounds like most of your good work fell on death ears. EPA should really anagram into Egotistical Pretentious Arseholes (EPA). The problem I find with all this is that they don't seem to have any other viable alternative for cutting emissions or stopping the climate control programs.

These people can pass all the motions and objectives that they want, it won't be achieved and they will always lobby for what they want. Never mind about anyone else, as long as profits continue to come in and control over everything they set their eyes on.... what else matters.

Either environmental groups start lobbying for control of the environmental protocols, so they themselves can be the policy makers. Then environmental issues will get some serious action taken upon them

Money is really the motivator and the way I see it we have to do away with money, otherwise we won't change anything. It would be great to see in future many other groups to start looking into the ideas, AND I MEAN LOOK INTO THE IDEAS of Jacque Fresco and The Venus Project.

Combining the efforts of Chemtrails Project UK and the activist groups and telling people that there are better ways of doing things, that is the way it will stop chemtrails, pollution and wars in the future. Its just my thoughts but something to consider.

Well done everyone again though for all your hard work.

These practices are against all moral standards that I know of and can only be described as nefarious. If I could I would sue everyone involved for seriously affecting my emotional and physical wellbeing. Who on Earth do these people think they are? The honest answer would be scary.
