Chemtrails—those ubiquitous aircraft sky graffiti—have been implicated in what’s called weather geoengineering that’s been going on for many decades, but increasing dramatically and globally in the last decade.

For readers who may be new to the concept of controlling the weather or using weather as a “weapon of war,” here is a blog I wrote, “**An Indisputable Database for Chemtrail Deniers,**” that can bring you up to speed on what’s been going on and is ongoing.

Numerous independent scientists and researchers doggedly have investigated what’s being called “contrails,” but actually have been proven to be patented chemical formulations emitted from specifically retrofitted aircraft to spray toxic chemicals, biologicals, and heavy metals into the troposphere in order to engineer weather patterns globally.

And in [this article](#) we learn that weather geoengineering is stealing rain from the western United States.

GeoEngineeringWatch.org has been at helm of exposing the abnormal weather conditions resulting from the deliberate toxic chemical assault and spraying of the Planet, humans, and all life forms for several years and finally has gotten to the point where it's assembled legal teams in the USA and Canada to institute lawsuits.

Here is Dane Wigington's article explaining what they will be doing to bring accountability to the forefront regarding chemtrails, weather geoengineering and all the ancillary 'projects' that go along with controlling the weather.

However, those of us who are concerned about what's going on above our heads daily, now we can do something to help the legal wheels roll: We can contribute financially to support their noble efforts on our behalf. Contributions to the non-profit "Stop Geoengineering Legal Defense Fund" can be made [HERE](#).

GeoEngineeringWatch.org website has clocked over 20 million visitors to its website. If every one of those visitors were to donate one dollar, the Legal Defense Fund would be well on its way to "kicking ass" as they

By the way, I made a humble donation of \$50. What can you do to help out? And, most of all, thanks for whatever you can do, including educating others about the serious health and environmental problems being created by weather geoengineering and chemtrails.
