If you're like me, I have to wonder how many times you look up to the sky and, upon seeing "sky graffiti" or what some call "chemtrails," technically and scientifically known as "weather geoengineering," cringe at the thought of all those toxins, chemicals, poisons, viruses, aluminum chaff, etc. being sprayed and what they are doing to our lungs, food, water, rain, snow, environment, and beloved planet.

Which commercial airliner would fly in such an erratic flight pattern so as to 'decorate' the sky with what some adamantly claim are contrails? Here's a real contrail coming off the wing as a wisp not a concentrated cloud formation.

The problem in U.S. and Canadian skies is so overwhelming and critical that lawsuits are being filed to intervene, if it's not too late! However, monetary backing is greatly needed to fund the legal fees involved [1].

Since Solar Radiation Management apparently is a one-world-order-cabal contraption going on for a few decades, as we've been seeing in the sky, there will be much to uncover during what's known in law as "discovery," plus depositions and other filings that the legal teams in the U.S. and Canada face in order to grapple with the thousand-pound gorilla in the room everyone who breathes must deal with—like it or not!

I feel compelled to ask readers everywhere to sit back for a moment and remember the skies and weather patterns of your childhood. I never saw skies for over 60 years like I see today! What's happened? I'll let Dane Wigington of GeoengineeringWatch.com explain in part in this video.

After Dane's years of research and unending efforts to expose the poisoning of the planet using government and private contractor patent technologies and airplanes, there's been an outcry for justice and relief to the point where legal teams have formed and are working to execute legal procedures in the United States of America and our neighbor to the north, Canada.

Stop Geoengineering Minnesota (SGMN) is the legal entity that can collect money and assets to fund the legal work. According to Petra Brokken at *Stop Geoengineering Legal Defense Fund* of Stop Geoengineering MN wants everyone to know

I want to make it clear that we at StopGeoengineeringMN are working directly with Dane Wigington and his attorneys on the legal effort. At this point, all of our monies will be going to help the lawyers that have been organized in connection to him.

Petra goes on to say,

likely demand countless hours of time from the attorneys. Although the attorneys are working at a reduced rate, they cannot focus on these specific lawsuits without more funding.

If you would consider asking a friend or acquaintance to make a donation, that would be so helpful! Any amount will help. There are so many activists who would like to help and who may not realize that there are lawsuits on the way, and that the lawsuits need support.

Those of us at Stop Geoengineering Minnesota are continuing to work hard to find funding for the lawsuits. We have held and will continue to hold fundraisers, and are hoping to have some fundraising on social media soon as well. Your dollars, however, go to the lawsuits and not to our other fundraising efforts or to us.

If you want to see the geoengineered weather crimes

against humanity stop, I invite you to make a donation to the Stop Geoengineering Legal Defense Fund. Any amount definitely will be helpful, plus you will receive updates as to how the money is being spent.

My last update, since I made a contribution, stated they paid four attorneys \$1,000 each for legal filing fees, as I understand the attorneys are offering their services, but need money to file court papers, and when the law suit is filed in Canada, they will send \$1,000 to that attorney.

Please consider the benefits of stopping weather geoengineering, colloquially called “chemtrails.” The legal work, literally, is a life and death issue. Here’s the online website to make a donation, and thank you very much.
