GeoengineeringWatch.org Introduces The US Anti-Geoengineering Legal Team

May 16, 2016 [127 Comments](#)

[Dane Wigington](#)
geoengineeringwatch.org

The military industrial complex is completely out of control, the [ongoing global climate engineering atrocities](#) are the most dire and glaring testimony to this fact. Official government documents ([like a 750 page US senate report](#) and an [80 page presidential report](#)) prove this fact beyond reasonable doubt. In the power structure's increasing desperate attempt to hide the truth, there is now an [illegal federal "gag order" on all National Weather Service and NOAA employees](#). The [long and growing list of climate engineering patents](#) is also a glaring confirmation of global climate engineering and the powers invested in it. Those in power would have us believe that we cannot "fight the system". They would have us believe that the efforts of a few cannot make a difference or "turn the tide". We must never accept this lie. All of our combined efforts (especially including all the front line activists that are doing their best to sound the alarm) have helped immensely to [raise public awareness on the critical climate engineering issue](#). As that awareness grows exponentially, many new activists have joined our ranks from countless professions. Some of those that have stepped forward are concerned and courageous attorneys. The attorneys introduced below are a part of the US legal team that is working with GeoengineeringWatch.org on the critical effort to expose and halt the ongoing climate engineering insanity in addition to the [Canadian legal team that geoengineeringwatch.org is working with](#). Over the last year I have had the distinct honor of working with each and all of the attorneys introduced below (and several more on the team that may be introduced at a later date).

James T. Grant, ESQ

Education

Stanford University (1987, B.A., Political Science, with distinction)

University of Michigan Law School (1991, J.D.)

LAW FIRM AFFILIATIONS Humphrey + Grant (March 2016 to present)

Glaser Weil (November 2010 to March 2016)

Law Offices of James T. Grant (August 2005 to November 2010)

Stephan, Oringer, Richman & Theodora (January 2004 to July 2005)

McDermott, Will & Emery (June 1996 to December 2003)

Stern, Neubauer, Greenwald & Pauly (June 1993 to May 1996)

Latham & Watkins (October 1991 to May 1993)

Law Practice Experience

Experienced civil litigator and trial lawyer in a broad spectrum of business disputes and other civil matters through trial and appeal in state and federal courts, as well as through arbitration, mediation and other forms of alternative dispute resolution. Representation of a wide range of Fortune 500 companies, mid-cap and small-cap companies, and individuals in, among others, the technology, motion picture, television, publishing, manufacturing, retail, health care, real estate and banking industries.

Named a Super Lawyer by *California Lawyer Magazine* for 2007 through 2013.

Just look up and you will see the climate modification and cloud engineering programs by the federal government, its contractors and other affiliates going on in our skies almost every day. They are releasing toxic chemicals over our heads and environment without scientific justification, public debate or legal permit. That is not “natural” cloud formation or the byproduct of commercial aircraft. The elephant in the sky is real and is subject to the rule of law, including the law of gravity. The resulting damage to our environment and human health is widespread.

There is no “pharmaceutical fix” to climate change and global warming. As Albert Einstein said: “We can not solve our problems with the same level of thinking that created them.” We deserve answers from the groups releasing toxic chemicals over our heads, as well as from those who have turned a blind eye to them, in violation of our environmental and human rights laws. President Lincoln said: “I am a firm believer in the people. If given the truth, they can be depended upon to meet any national crisis. The great point is to bring them the real facts.” We all must wake up and confront the reality of what is happening. Martin Luther King, Jr. said: “There comes a time when one must take a position that is neither safe, nor politic, nor popular, but he must do it because conscience tells him it is right.”

As an attorney, officer of the court, citizen of this nation, and steward of this planet, I have a fiduciary duty to shine a light on the climate engineering programs occurring virtually every day over California and across the country. The federal lawsuit we are preparing and will soon file seeks to stop the climate engineering programs and have those involved answer to the people and planet. Hopefully, the lawsuit will also spark public debate and real media attention to address the challenge of climate change in a responsible manner and without further delay. Time is of the essence to do the right thing.

Robert L. Wegman, ESQ

The Law Office Of Robert L. Wegman, PLC

Robert L. Wegman, PLC, is a Chesapeake attorney serving the Hampton Roads, VA, area. Born September 2, 1961, in Columbus, Ohio, Mr. Wegman grew up in a military family. His father retired from the Air Force, and as a child Mr. Wegman spent a great deal of his life living on military bases, and surrounded by the honorable men and women of the U.S. Military. He graduated from undergraduate school in 1983. In 1989, Mr. Wegman was selected to attend Coast Guard Officer Candidate School. He proudly served for almost 12 years achieving the rank of Lieutenant Commander. While serving many quasi-legal and operational roles during the aftermath of massive Exxon Valdez oil spill, he gained a keen interest in environmental law. He decided to apply for the highly competitive and prestigious Legal Education Program, and was one of 4 selected to attend law school full time.

Mr. Wegman chose New York Law School in Manhattan where he was meritoriously selected to be an editor of the heralded Law Review. Upon graduation with his Juris Doctorate degree, he was transferred to MLC Atlantic and Atlantic Area commands in Norfolk and Portsmouth, respectively, where he served in the Legal Division. His military experience served to further his dedication to his clients. While in the Coast Guard, Mr. Wegman was temporarily assigned to the Naval Legal Service Office, where he defended the rights of sailors and marines in countless Administrative Discharge Boards, Boards of Inquiry, and Courts-Martial, involving the most serious charges and offenses. He also spent 20 months as a Special Assistant United States Attorney in the Norfolk Division where he prosecuted felonies and misdemeanors in federal court.

Mr. Wegman resigned in 2000 to pursue private practice. He was hired as an environmental lawyer with the renowned law firm Paul Hastings Janofsky & Walker on Park Avenue and 55th Street in Manhattan. There, he did a lot of environmental site assessment work and represented the Intrepid Sea Air Space Museum in asbestos litigation before the New York Department of Conservation. He also assisted with rewriting sections of the leading treatise on New York Environmental Law.

Following the tragedy of 9/11, Mr. Wegman volunteered to assist grieving families, particularly those of first responders with their legal needs, including affidavits pertaining to their missing and presumed dead loved ones. The slow down in the real estate market in New York led Mr. Wegman to pursue other options where in 2003, he opened his own firm.

Michel de Montaigne in the 16th century once said "Ignorance is the softest pillow on which a man can rest his head." Though that prolific statement applies more today than at any point in my lifetime, I can only wonder what he would have said about complacency. How can a rational person look into the sky and think the ubiquitous persistent trails,

creating grid-like patterns are anything but the work of forces bent on destroying earth's life support system? I joined the movement to end geoengineering. I have witnessed the destruction of plant and animal life, and I have heard too many people attempt to explain away their own irrational and sudden respiratory health issues, including chronic fatigue, using rational thought.

Nothing is more frustrating than attempting to discuss the possible causes of planetary destruction with people who refuse to see what is "hidden in plain sight." People are simply too preoccupied to look up, and they lack the intellectual curiosity to see if what I am saying could hold a kernel of truth. It's more than fair to say this team is risking friendships, public and private humiliation, and even marriages to do what has to be done. Mankind is on borrowed time. By the time people wake up, it may well be too late to save our home (the earth) and ourselves. But, I cannot, and will not, go down without a fight. I thank Dane for helping me to find some sense of order out of this chaos. His website has been a valuable resource. He has opened my eyes, and I am honored to be a part of the legal team.

Finally, Montaigne is also credited with saying "if you don't know how to die, don't worry; Nature will tell you what to do on the spot, fully, and adequately. She will do this job perfectly for you; don't bother your head about it." The planetary destruction is not natural, thus I will worry my head about it until I can no longer do so. The military/industrial complex Eisenhower warned us about has been running amok and must be stopped. As we used to say in the military: lead, follow, or get out of the way. Dane has demonstrated how to lead. I am more than prepared to follow and I urge the rest of you to do the same.

Petra Brokken

Petra Brokken is an attorney living in Minnesota. She received her J.D. in 1992 from the University of Minnesota and an M.A. in English Literature from the University of Wisconsin/Madison. She has a background in Family Law and Criminal Defense. She has a long-time interest in the environment,

health freedom, and animal rights. As such, she is a founding member of Stop Geoengineering Minnesota and Stop Global Geoengineering, as well as Safe Technology Minnesota. She is a current Board Member of the Minnesota Natural Health Coalition. She lives in Minnesota with her husband and two children and their many rescue pets. You can contact Petra through www.stopgeoengineeringmn.org.

Deliberate climate modification through aerosol spraying is the greatest manmade environmental disaster that has ever occurred on the planet. I have long been an environmentalist, but a few years ago when I woke up to what was happening in our skies, I realized that unless we stopped climate modification, the other environmental issues would be moot. Though I believe that educating others that this happening is very important, nothing much stops in America without lawsuits. If we have any hope to stop geoengineering at all, I believe that lawsuits are the best way. I am here to provide support in helping these lawsuits go forward.

William Blackwell

William W. Blackwell is a graduate of the University of Colorado School of Journalism, with a Bachelor of Science degree in Advertising; and a graduate of Western State University College of Law, with a Juris Doctorate degree. He is a member of both the State Bars of Georgia & California; and until recently maintained his primary office in West Hollywood, CA, specializing in Intellectual Property Law with an emphasis in the field of Music Entertainment. He currently resides in the Lake Tahoe area of Nevada, with his wife Angela.

Residing in a beautiful area, such as Lake Tahoe, it is clear that in order to protect such a valuable resource, one has to first become aware of the dangers of pollution to both the air and water and the horrific effects it can have, and is having, to our environment and personal health. I am truly blessed and honored to be apart of the Anti-GeoEngineering

Legal Team, and to assist in bringing our legal actions to the attention of the Media so that the public at large can become aware of those dangers, and the negative impact it is currently having, not only here in the United States, but around the world.

Joseph H. Marman

Joe Marman has been an attorney for 27 years, and was a Board member of the Capitol City Trial Lawyers for 10 years and a member of California Consumer Attorneys. Joe was the Vice Chair of the Auburn Chapter Sierra Club. Joe also acted as a Judge Pro Tem for Settlement conferences, Mediations, and Arbitrations on civil cases. Joe has previously volunteered for 13 years for the Placer County Search and Rescue Team in his community.

I have been working with GeoengineeringWatch.org and Dane Wigington and with our connections we have 8 attorneys in the US and several in Canada with whom we collaborate in weekly telephone conferences to plan our attack. Some of us are long time environmental attorneys and others of are civil litigation attorneys with a strong conscientious intention to protect or planet from evils of capitalist manipulation of our planet's resources.

Edward A. Strenkowski

Ed Strenkowski has been a lawyer for over 37 years and has a nationwide practice dedicated to excellence in all areas of environmental, health & safety law. His experience includes federal, state and private party litigation in all areas of regulatory and administrative law, including agency enforcement and compliance counseling. He is licensed in Texas, Oklahoma and Louisiana, as well as the federal district and appellate courts.

"It's pretty simple actually. It's a serious felony to dump noxious and harmful substances into the Nation's water supplies without federal permits.— No one in their right minds would think this is a lawful activity. Day after day with reckless indifference these polluters engage in egregious and flagrant violation of the bedrock of our water health and safety laws — the Clean Water and Safe Drinking Water Acts. And to see the federal and state regulators sit idly by and look the other way is equally abhorrent — they have betrayed their oaths and the sacred trust of their offices by failing to exercise vigilance and enforce our nation's pollution laws designed to protect us and the environment. The mission of our legal team is to do everything possible to put an immediate end to this constant and unrelenting poisonous dosing of us and our nation's waters through unauthorized aerial spraying. And we are going to stop this activity by going to federal court — the courts are the highest authority in the land, and our best chance for relief from this insanity.

As private "attorney generals," we are taking these polluters and our delinquent regulatory agencies to court using the citizen suit provisions of our environmental laws. Our message is simple — you break the law, you suffer the consequences, including restoration of the environmental damage you caused. Those involved in this around the clock aerial dumping by spraying make the heinous midnight dumpers of yesteryear look like little leaguers by comparison. We will stop this insanity."

Dane Wigington

For the last twelve years Dane has been completely focused on investigating, exposing, and halting the ongoing global climate engineering insanity. He is the lead researcher and administrator for the website GeoengineeringWatch.org. He was a former employee of Bechtel Power corporation and has a background in renewable energy. Dane's completely off-grid home in the wilderness of Northern California was the cover article of the world's largest renewable energy magazine. When Dane began to note massive losses in his home's solar power uptake due to solar obscuration (the blocking of the sun from the ever more aggressive and obvious jet aircraft spraying of atmospheric particulates), he began constant research, lab testing, and reporting on the climate engineering/solar radiation management issue. For over a decade, Dane has given data presentations on the climate engineering issue in hundreds of radio forums and [public speaking awareness events](#), in addition to speaking and presenting data to many agencies and officials including the California Air Resources Board, the California Energy Commission, the [Shasta County Board of Supervisors](#), Barbara Boxer's office, [US Congressman Doug LaMalfa](#), and California Lieutenant Governor Gavin Newsom (and his aids) in Lt. Governor's office at the California State Capitol.

The climate engineering atrocities occurring in our skies came to my attention when I began losing massive amounts of solar power uptake (on my off-grid residence) due to the jet aircraft spraying/dispersions that were rapidly increasing in frequency and intensity. After numerous lab tests confirmed the highly toxic climate engineering contamination was saturated in the air column and thus poisoning not just my region, but the entire planet. I was left with no alternative but to focus all my efforts and energies on this critical issue. I have never been politically minded, and have never before been an activist. I am a concerned father that feels I have a responsibility to my children (all children), and to the planet as a whole on which all life depends. Global climate engineering/geoengineering/solar radiation management is mathematically the greatest and most immediate threat we face short of nuclear cataclysm. I wish to express my deepest gratitude to all the attorneys that have joined this most critical effort, and my deepest thanks to all the activists who are dedicated to this most important fight for the greater good.

If we are to have any chance of exposing and halting the ongoing global climate engineering assault, awareness raising efforts must be continued and advanced on ALL fronts of the battle. Though the legal effort is an essential part of the overall effort, the pending legal action does not negate the need for all other [credible awareness raising efforts](#) to continue moving forward at the fastest possible pace. The pending US legal action, being prepared by the combined efforts of the legal team and [GeoengineeringWatch.org](#), is not affiliated with any other groups, organizations, websites, or individuals. Any that wish to further support the attorney team can do so through the 100% non-profit fund [here](#), all contributions are 100% tax deductible. We are rapidly running out of time as the biosphere implosion accelerates, we must all [make every single day count in this all important battle for the greater good](#), all of our voices matter and are essential. There is [only one way forward in this fight](#), to reach a critical mass of [climate engineering awareness](#) with the overall population, this effort will take every single one of us.

Thank you, thank you, thank you Dane and the entire U.S. Anti-Geoengineering Legal Team!

Words are inadequate to tell you how immensely grateful I am.

A sky-watcher since childhood, I became aware of this atrocity in 1998. When a letter of inquiry and concern to my Congressman went unanswered I called his office to follow-up. I was told the massive Xs and tic-tac-toe patterned sky-trails were "normal contrails from jet planes."

I called back later hoping to speak to someone else. A pleasant young woman answered and said she'd check on my letter. She returned and apologized for taking so long explaining that my letter wasn't where constituents letters usually were. She had to look elsewhere because my letter was "red-flagged." When asked why it was red-flagged and what that meant, she became flustered as if she'd said too much. Stumbling over her words, she said that maybe he didn't have an answer yet. Three months later, I received a curt written response informing me that they were, "normal condensation trails from jet planes."

I've observed chemical skies with a heavy heart for nearly 18 years now. I've watched countless blue skies disappear. I've experienced serious respiratory problems and witnessed the same for others. I've had frequent and repetitive nosebleeds with no explanation for them. I've had severe brain fog. Sometimes my muscles and joints ache so badly it's hard to walk. The lab tests are always "fine." I've watched trees die, my garden dwindle and birds disappear. I look at the sky and see huge xs or plumes over my house and can't help but think that we're living in hell.

This pending lawsuit has been a long time coming. You've given me hope today. You've renewed my courage and inspiration to keep informing others and to keep fighting. Thank you!

Who are the weather officers ? Operation Popeye is global-
<https://youtu.be/Cpr5JVWjIW4> a weapon of mass destruction-
<http://www.ofcm.noaa.gov/fedplan/fp-fy10/pdf/3Sec3c-DOD.pdf> The Air Force and NOAA chemtrailing and creating storms in Florida to generate money in higher instance premiums for house and car insurance and health insurance. It is also fraud from theft of federal assets from the once very full and now empty disaster fund. This is insurance fraud and murder in cases of drowning a boating accidents car accidents and from hurricane Andrew, hurricane Katrina, hurricane charley, hurricane sandy. The real estate agents are tied to weaponized weather assaults on homeowners and its tied to torture murder and fraud. Do the 4100 military and civilians running weather modification programs have side business in construction companies and landscape companies and city agencies? I wonder how many of these employees run insurance companies or landscape companies or contracting companies? USAF METEOROLOGICAL AND SPACE ENVIRONMENTAL SERVICES OVERVIEW Air Force weather forces provide high-quality, mission-tailored terrestrial and space environment observations, forecasts, and services to the U.S. Air Force (USAF), U.S. Army (USA), and a variety of U.S. Government (USG) departments and agencies. Air Force weather enables Joint Warfighters to anticipate and exploit the weather...for air, space, cyberspace, and ground operations ORGANIZATION AF weather is functionally organized under the Director of Weather (AF/A3O-W), Directorate of Operations (AF/A3O), Deputy Chief of Staff, Operations, Plans, and Requirements (AF/A3/A5), Headquarters Air Force. The Director of Weather oversees Air Force-wide training, organizing, and equipping of AF weather organizations to include the following functions: Development of doctrine, policies, requirements, • and standards for weather support for worldwide AF, Army, and Special Forces training and combat operations Evaluation of weather support effectiveness for • worldwide training and combat operations UNITED Management of weather officer, enlisted, and ci• vilian career fields Development and implementation of mid- to • long-range plans for the organization, equipment, manpower, and technology necessary to meet future Air Force, Army, Special Forces, and other DOD agency weather requirements Advising Air Staff and subordinate headquarters • weather functional

managers regarding manpower, career field management, personnel utilization, training, operations policy and procedures, and technology acquisition. Advocating and fielding standardized weather AF weather operations provide a Total Force capability employing over 4,100 Active Duty (AD) and Reserve Component (RC) military and civilian personnel supporting Air Force and Army conventional and Special Operations Forces (SOF) worldwide. The majority of AF weather personnel are focused on two distinct, yet related functions: characterizing the past, current, and future state of the natural environment, and exploiting environmental information to provide actionable environmental impacts information directly to decision-makers. AF weather is organized in a 3-tier structure to maximize capabilities that can be accomplished in the rear area via "reachback" technology. This minimizes forward presence on the battlefield, making a "light and lean" presence consistent with the overall USAF vision for contingency operations in the 21st century. AIR FORCE WEATHER AGENCY (AFWA) The centerpiece of global-scale collection and production is the Air Force Weather Agency (AFWA), Offutt AFB, NE, a field operating agency reporting directly to the Air Force Director of Weather. AFWA performs two distinct functions for AF weather. As part of its Lead Command responsibilities, AFWA plans, programs, and fields standard weather systems. At the same time, AFWA has a strategic-level operations and production function. Specifically, AFWA is charged with collecting, analyzing, predicting, tailoring, and integrating weather data at all operational levels. Through the execution of the second function, AFWA provides timely, accurate, relevant, and consistent terrestrial and space weather products necessary to effectively plan and conduct military operations at all levels of war. AFWA operates a satellite data processing center and a centralized climatology center with the largest military archive of meteorological data in the world. The agency runs numerical weather prediction models, conducts global cloud and snow analyses, and runs cloud analysis and forecast models. AFWA also maintains a global meteorological database, and provides dedicated support to the Intelligence Community (IC). AFWA consists of a functional management headquarters; the 1st Weather Group (1 WXG) with three subordinate CONUS operational weather squadrons (OWS); the 2nd Weather Group (2 WXG), which operates three squadrons, two at Offutt and one at Asheville, NC; the Air Force Combat Weather Center at Hurlburt Field, FL, which supports the Combat Weather Flights and Battlefield Weather Teams through investigation, development, integration, exploitation, and training across new and existing systems and processes; as well as five detachments and operating locations. The 1 WXG commands three operational weather squadrons that conduct weather operations in support of Total Force Army and Air Force operations in the CONUS:

Amador County California Spray Alert !

Air quality in Jackson this morning looks like a War Zone .

All of the activist's in the good old USA need to post Spray Alerts for each and every Spray Day we are being Poisoned with .

Please post your Spray Data .

The State of California will wish they never let this happen when we get finished with them at a Court House of our Choice .

Proposition 65 has big Teeth !!!!!!!!!!!

Killer Dana out .

It appears the U.S. Senate has just unanimously passed a bill that would allow the families of 9/11 victims to sue Saudi Arabia for it's (alleged) role in the attack. Though Obama will likely veto it, this entire endeavor in Congress has the stain of well orchestrated disinformation and deception, way more than likely instigated by the very elements within our government that were part and parcel of the whole 9/11 plan in the first place, or perhaps their successors. Does anyone here actually think Saudi Arabia had anything to do with this debacle? If so, you need to spend another few years investigating the matter. What a perfect ruse: to (allegedly) allow free passage of the Bin Laden family members out of the country on 9/11 by air, when ALL other flights were grounded due to so-called "National Security" concerns. This cemented within the public mind all the various simplistic theories that the Saudis (thus the Bin Ladens) were the darlings of the Bush administration because they (the Bush family) were oilmen, etc. They snow-jobbed us all with that one. But it effectively drew attention TOWARD the (bogus) theory that 19 mostly Saudi hijackers carried out the attacks. Absurd in the extreme!!!!!!

Fast forward to this current Senate bill. Yet another lame-ass attempt to draw attention TOWARD the Saudis and reestablish a connection in the public mind between the Saudis and 9/11. LAME!!!

Proof positive that the guttersnipes behind these social engineering schemes are still hard at work to this very day.

HEADS UP FOLKS: <https://shar.es/1d3Tjk>

Approved by authorities and opposed by many people, they decided to spray a bacteria with pesticide properties called *Bacillus thuringiensis*

(Bt), the bacteria from which a gene comes that is used in GM crops to kill insects. > SEE:

Bacillus thuringiensis is a genetically altered agro bacterium, and is VERY dangerous, as it can mutate across plant and animal domains, and into human DNA... This kind of insanity NEEDS TO BE STOPPED. Please see:

Abstract

"Conjugative transfer of DNA that occurs between bacteria also operates between bacteria and higher organisms. The transfer of DNA between Gram-negative bacteria requires initial contact by a sex pilus followed by DNA traversing four membranes (donor plus recipient) using a transmembrane pore. **Accumulating evidence suggests that transfer of the T-DNA from Agrobacterium tumefaciens to plants may also occur via a conjugative mechanism.**<http://www.ncbi.nlm.nih.gov/pubmed/7914664>

Paul, I recognized this bacteria the second I read it at the beginning. Am I gonna have another sleepless night?! It is a good bet! Damn these guys to hell and back again! I could spit tacks! Like a nail gun! Gee, I almost asked why, why? Why wreck my world even more! Because they can, and because non of us want their freaking GMOs and the poisons that go with. Sons of hell. Hell on Earth. I mean, just when you think it cannot get worse, it does. I may lose my mind. What is left of it anyway. Uh, gee, thanks? I do mean thanks, just hard to say at the moment. Thank you Paul. I'll have such fun in my gardens today. Not! And, guess I got my DNA done too soon.

[May 18, 2016 at 7:55 am](#)

The poster for the movie This Changes Everything shows the earth on fire.

Now that our atmosphere has been sprayed to change it from an insulator to a conductor of electricity, the weather warfare is beyond insane. Methane release resulting in a firestorm...?

- o  *a simple horseman* says:
[May 18, 2016 at 6:54 pm](#)

Marc, my apologies and forgetfulness. I always read your comments, often twice. Sorry I did not write more when I wrote this comment. I was having computer problems at the time. Personally, I am continually amazed as to how folks will not face what is happening to us all. Dane keeps harping away on how we need to reach critical mass awareness. I know that is our only way of even thinking about saving our planet/home. I wonder what an atmosphere contains after a global methane fire? If or when the time ever comes, I will be like the Woody Harrelson character in 2012 standing on the edge of the Yellow Stone "super volcano". I will have done my best to tell folks of the impending doom and be shouting "bring it!" when I am taken out. I have and always will face my foes head on. I hope we all will prevail and survive. Someone responsible needs to clean our home. I'm ready, yesterday.

Note to Geoengineers – you can run but you can't hide. The legal SMART BOMBS are gonna get you.

The engineered cool downs across North America pretty impressive. Temps way BELOW NORMAL everywhere. Here in SoCal it RAINS every few days lately thanks to enhanced cloud cover, increased convection. Rain seems to materialize out of thin air now. In May?

US earthquake activity past 24 hrs very telling.

M3.1 near Carlsbad, NM/ rain expected next few days

M3.2 near Dillon. MT/ rain expected next few days

M2.7 near Bardwell, KY/ rain heading your way too.

USGS have an explanation for all the widely scattered seismic activity? No. But I do. I AM the HAARP/earthquake guy after all. And proud of it.

Freakin' NINETY degrees in Marin County, CA, near San Francisco bay today, after having had a spell of sparse rain and very cold weather, after heavy spraying. They're baaaack today, spraying away all up and down and all over in every insane direction only

a "weather guru" could imagine.

- o  *Rachel Robson* says:
[May 18, 2016 at 1:18 pm](#)

@Dennie, I don't know why you posted under SD but yes, yesterday was so much hotter than I expected though I don't know how hot Berkeley got. Do know that a couple of weeks ago one beloved hen of mine died for no apparent reason. I checked her out thoroughly, bringing her into the house-not a scratch on her perfectly beautiful and clean body. I revived her, thought she would make it, but no. I still can't get over it and could not afford an autopsy, but wished I'd done one myself. Not that I am skilled at that, but most birds in my life in serious trouble I've been able to save. Chickens are prone to heart attacks. But the others are fine and not talking about it-to me anyway! Except one other is not laying and normally she lays all the time, did lay a few some months ago, zip nada since. Hens need a certain amount of light per day in order to make an egg. One dead-gorgeous bird at that-one not laying, leaves me hanging by a thread.

From high heat yesterday to chilly today. And yet another bee in house yesterday. I have noticed the return of some native bees, not all, but some. And many more bugs. The winds are sucking the life outta plants. The ground is quite dry already. Out my west window in kitchen here, I can see one long spray trail. The sky today is whited out blue.

- 9.  *Marc* says:
[May 17, 2016 at 5:02 pm](#)

Dane, in a world gone so heartbreakingly insane, with utterly incomprehensible denial and/or blindness to what so many hundreds of thousands of us KNOW WITHOUT QUESTION IS HAPPENING ACROSS OUR SKIES, to see this lineup of professionals who actually GET IT, causes my eyes to water and my heart space to fill with gratitude and emotion. For every person I've talked to who has laughed off my comments about geoengineering, or ridiculed me on Facebook, or rolled their eyes and shot back insults, impugned my intelligence and my judgment, I say to each and EVERY SINGLE ONE OF YOU, it is YOU WHO ARE TO BE PITIED AND CALLED OUT FOR YOUR STUPIDITY, YOUR ARROGANCE, YOUR ILL-INFORMED KNEE-JERK COMMENTS AND /OR REACTIONS TO THIS MOST PROFOUNDLY IMPORTANT ISSUE OF OUR TIME. YOUR CONTINUED DENIAL AND RIDICULE WILL SOON ENOUGH MELT LIKE THE GREENLAND ICE SHEET IS MELTING IN THE BLAZING SUN.

All who come here to this site, if they truly study, and follow the links and assimilate the mountains of data here, cannot possibly come away from it all a skeptic. This one website is far and away the most superior "one-stop-shop" experience one can find on the net. Dane covers so many different angles to this complex issue and has been doing so for so many years. While I completely understand Dane's habitual humility in the context of this fight we're in, I must personally extend my admiration, my respect and my profound gratitude to Dane Wigington for originating this incredible website, for opening the eyes of what now must be millions, and for his unerring commitment and common decency in the face of impossible odds. This introduction to the legal team is yet more evidence of Dane's tireless work behind the scenes. I personally had an opportunity to chat briefly with Joseph Marman of the Team at the Redding event last August 14th. He was forthright and answered all my questions without hesitation. A very likeable fellow, indeed.

You see, what the deniers and the arguers and the disinformed and the ridiculers do not seem to understand is that all of US who actually GET IT, who understand deeply the truths about the

reality of geoengineering, HAVE NOT LEFT THEM OUT OF OUR THOUGHTS. We are each doing our part not just for ourselves, or for our children or our grandchildren. WE ARE DOING WHAT WE DO FOR THE GREATER GOOD OF ALL OF HUMANKIND, FOR ALL LIVING CREATURES, AND FOR THE BIOLOGICAL HEALTH OF OUR PLANET. HOW COULD IT BE OTHERWISE?

Finally, the fact that there now exists a "Legal Team" here in the U.S. proves that the issue is not a chimera. And it also reveals by it's very existence that the gravity of our situation has reached life threatening proportions.

[May 17, 2016 at 9:27 pm](#)

Your comment echoes how I feel too, Marc. My rather lengthy comment on this post was accidentally lost yesterday just before I was about to submit, but that's ok. I really just want to say thank you to the attorneys and of course, Dane. But no matter how much I say, those words can never capture the eternal gratitude that I, and I'm sure all of us, feel. I'm in constant awe of Dane and I feel he's probably borne the heaviest part of this cross, so seeing this incredible legal team brings me comfort, especially, to know that he has the support of some very solid, committed people who will help carry the torch. The wise words of Mr. Grant (and Einstein) ring so very true to, "There is no "pharmaceutical fix" to climate change and global warming. As Albert Einstein said: "We can not solve our problems with the same level of thinking that created them."" and I would say the same goes for achieving a geoengineering free planet, something Dane has been an inspiring testament to. Thank you again to all the attorneys for the profound difference you will, and are making.. just knowing you are in this battle already feels like a victory.

Three days of no chemtrails here in Kern County. Today was beautiful with puffy clouds (real ones) and thunderheads. I have not seen this in years! Everyone that I see and talk to are mentioning the clouds. Here in Kern County it is an all out assault every day by the sky demons. I even have hope that this is last of the spraying, perhaps they have seen the posts here and know they will be exposed soon. Thank you Mr. Wigington for all that you have done, I can't even imagine how you hang on. I know from my own experience when I was first made aware of the spraying back in 2003. When I have talked to my friends and even family about the chemtrails they all have given me the "look" and pretty much written me off as a "tin foil hat crazy". I would also like to thank all of the lawyers and the people who post here. I will never give up on alerting whoever I can. Even if the spraying stops the ones that are responsible still need to be held accountable. On a beautiful day like this I have renewed hope that it can be normal again. Thanks to all you brave people.

Big T

I am well aware of that awful, skeptical side-eye look that says " you should put your tin foil hat on". But I'm starting to not care what people think of me. I've had people unfriend me on FB just for posting Dane's articles.

11.  *DuEwa* says:
[May 17, 2016 at 3:26 pm](#)

Dane,

I have put together credible evidence of climate engineering activities in the Washington DC area. Almost daily photos and notes of spraying campaigns at <http://www.skywatchdc.com> If it is useful, by all means use it.

My 10 yr old granddaughter said she want to interview an airline pilot and ask them why they are spraying. I told her they will not admit that it's happening because it's a secret. She looked at me dumbfounded and pointed to the sky. We were watching the planes spraying. So I said, sometimes things are hidden in plain sight.

Thanks for all you do. Keep Looking Up. DuEwa.

[Reply](#)

- o  *Nancy Lee* says:
[May 18, 2016 at 8:46 am](#)

Thank you for putting up this site. I too live in the DC area and cannot believe that no one talks about this, especially when it's so obvious every day. I'll check your site regularly and if there's a way to submit photos, I'd be happy to.

Wall Street Faces New Front for Lawsuits After Top Court Ruling

May 17, 2016

The ***U.S. Supreme Court dealt a blow to financial services firms*** trying to fend off allegations that they facilitate illegal short selling, ***affirming the rights of investors*** to make their case in plaintiff-friendly state courts. With the court's ruling on Monday, plaintiffs may find that such suits have a greater chance of advancing in a state court, potentially exposing brokerages to more expensive litigation, said Sam Lieberman, a partner at Sadis & Goldberg LLP.

"It's easier to have your case thrown out for procedural reasons in federal court,"

Lieberman said. "In state courts, you're more likely to get closer to trial, and get closer to trial means you're more likely to get closer to settling." New Jersey and other states also have *Racketeer Influenced and Corrupt Organizations Act* statutes aimed at organized crime that could be applied broadly enough to cover the conduct of financial services firms, said David Zaring, a professor of legal studies and business at University of Pennsylvania's Wharton School of Business.

[Reply](#)

14.  *JillR* says:

[May 17, 2016 at 7:44 am](#)

I am thrilled beyond belief. I'm so ready for something to happen. Just like the movie "Vaxxed" has blown open the public debate on the danger of vaccines after being very publicly pulled from Tribeca and with GMO labeling starting in Vermont in July forcing companies to let us know what's in our food, I hope this law suit finally brings the geoengineering crisis to critical mass. I think we can all feel a shift happening though I don't believe it will happen quickly enough to save our planet. I think the book "Eaarth" by Bill McKibben states our situation very eloquently. We had a moment in time during the Carter administration in the late 70's when we could have changed course, "away from the rocks". Most of me fights the big fight every day and I stand up to the status quo and speak out constantly. But I have to admit that there are moments when I just want to enjoy my life, my garden and walk my dogs in the forest to listen to the birds. I don't kid myself about what's happening, but I need a break as it's often too much to bear watching this beautiful earth being destroyed and listening to the stupidity and ignorance that is most of our society.

[Reply](#)

o  *Rachel Robson* says:

[May 17, 2016 at 3:32 pm](#)

JillR, Hello, and I agree with you. And, three doors away from me is a man who headed Carter's science program-in the main oriented towards schools. I want so much to ask him so much, but he is 92 and my two doors away neighbor, willfully ignorant regarding geoengineering is very protective of him, fearing I will bring this up. But the man is eager to talk about this heyday in his life, and I began by mentioning that under Carter, we Natives finally got the legal right to practice our religion. this was a very big deal to us, to all tribes, and this man is proud of that. It's a beginning. A foot in the door.

Like you, I too need a break, though it is hard to do for fear of missing something, but I so need my gardens and critters and all the pleasures to be found there. It rejuvenates the soul. Even if it does put me out in "whatever". A week ago, there were two nights I could not sleep at all owing to sadness I think. That never happens to me. Overload. With out balance and rest, what good am I in this effort? So, yes to whatever soothes your soul. It is a heavy load to carry and sad beyond belief. So, now for a break!

15.  *izzy* says:

[May 17, 2016 at 7:38 am](#)

This action should be a big step forward in making the general public aware of the reality of the situation, I sincerely hope it doesn't get derailed. And who knows what may come out as the curtain is pulled back – there is something deeply anti-human and evil about the whole thing. Certainly worth supporting with a contribution as well as appreciative notes.

[Reply](#)

16.  *Danny* says:

[May 17, 2016 at 6:19 am](#)

Shhhhhhhhhhh! No One is supposed to say anything about the BIG SECRET! The Big Elephant in the Room.

That is what is quite apparent when you see Gag Orders and MSM News keeping their lips tight.

It's all a Big Secret and nobody is supposed to know that we are getting Toxins Dumped on Us.

I wanted to mention about the child that was taken away from the Mother by the Authorities.

I think it was for mentioning Chemtrails.

Why if it is "Not True" about what she was Observing from her own eyes then WHY?

Would it be such a Big Deal if it isn't True?

Because people are supposed to follow orders and be dumb to the fact of the ongoing insanity that actually is Completely Nonsense.

Really!

And not speak a word of it because that would be Taboo

Anyone that thinks in a logical critical manner and points out to the Fact about their Observation's and Speaks out about the Flawed Geoengineering Program that is Not actually happening (BS)

Then why should they be punished if it's not going on?

Why would there seem to be a big concern then and have to Punish the Mother and Child?

According to Meteorologist's ,Air Force Bases, MSM, and Government Affiliates involved in this Project, they all seem to deny it.

Is it just an illusion which people witness each and every day?

I hardly think so.

I hope that this Lawsuit Awaken's People and that it is successful.

o *Dennie* says:

[May 17, 2016 at 11:10 pm](#)

That story was "posted on May 2, 2016," by "Baxter Dmitry:" ("Passionate about motor sports, military history and the truth, Baxter has travelled in over 80 countries and won arguments in every single one."): <http://yournewswire.com/court-takes-child-from-mother-after-she-mentions-chemtrails-at-school/>

The custody battle was waged in January, 2015. The mother, Becca Vandb, says that she can only see her child with a "social security worker" standing over her taking notes and "the judge said this was so that if I mention chemtrails they would put a stop to that." The judge that made the custody decision retired on July 31, 2015: http://ballotpedia.org/Dolores_Mallard

The article brings to light the fact that "An historic lawsuit has been filed in Canada in an effort to expose and halt the practise of chemtrails being sprayed into the atmosphere," so we are getting a little publicity about the Canadian lawsuit.

I do believe that 'all of us' are very excited for you Dane. This is a long journey for one man, and you deserve so much credit for everything you've done; and it 'is' because of your strenuous efforts that this is now falling into place. My prayers and well wishes for your success, to you and your new team. Be blessed.

[Reply](#)

- o  *Dane Wigington* says:
[May 17, 2016 at 11:56 am](#)

Hello Lea, this journey is a team effort, it is all of us marching together that can yet make the difference. I am only doing my part, and so many others are trying to do theirs. We must all continue to keep up our pace, every day counts.

21.  *ron* says:
[May 16, 2016 at 8:58 pm](#)

This is a strong step forward. I liked Robert Wegman's feelings about never giving up—no matter how much permanent damage has been done to the Planet's biosphere and atmosphere.

There is something at the heart of this climate engineering that is sinister beyond belief! As my research improves, I have had an incredible realization—the same as many before me! Without getting into the physics of it(I have a background in quantum field theory—which needs dusting off);HUMANITY LIES ON THE EDGE of what seems to be a DR. STRANGELOVE condition. I am talking specifically about PLASMA PHYSICS, TESLA low frequency electromagnetic waves which can PENETRATE THE ENTIRE EARTH INSTANTANEOUSLY!! With correct adjustment of ionospheric heaters aiming at man-made PLASMA EMBODIMENTS, a PULSE @ the right frequency can hit anywhere on earth!! If the electromagnetic energy is amplified, massive earthquakes, hurricanes,droughts, etc, can be triggered at once anywhere! The EARTH ITSELF is NOW, IN REAL TIME, NOT A BARRIER to these dark psychopathic creatures!! One can hardly comprehend what humanity has brought forth.In fact this has been going on for too many years—a DEEP STATE BLACK OP. The climate, the atmosphere has become a CONDUCTOR which allows streams of electrons(i., e., electricity) to move anywhere these semi-humans wish. Endless spraying keeps the CONDUCTOR in place. 30 years ago our atmosphere was an INSULATOR. Our atmosphere has been transformed. A total earth penetration is possible.

So we have a horrible situation where we inhale air filled with god knows what and a nano- or micro-particle stage actual layered atmosphere as a CONDUCTOR. Susan Ferguson knows more than I about this, I'm sure. But, I thought I should target the attorneys to let them know the full magnitude of what they are facing and look to you, Dane, as one who DOES NOT BACK DOWN. Many good vibes to y'all!

[Reply](#)

- o  *Dane Wigington* says:
[May 16, 2016 at 9:05 pm](#)

Hello Ron, thank you for your input. For the record, though we are well aware of the countless layers to this issue, we are keeping our action on rock solid ground that we cannot be knocked off of. Once the subject is completely exposed, critical mass, the rest of the wheels will turn.

- o  *BaneB* says:
[May 17, 2016 at 6:17 am](#)

ron: you have said what has been on my mind. I was lying in bed having the very same realization that these weather control terrorists are using the entire earth as their "force enhancer." You are right on about the aerosols being more than about weather control and warfare. The earth's natural "bio-rythim" is disrupted, repackaged, and set to an agenda for mass death and destruction. That IS the "onion." And so the laborious process begins. Peeling off the top layer, the most visible aspect of this gargantuan criminal activity, hopefully will lead into the destruction of the entire onion. Getting rid of this 'covert' toxic spraying of our atmosphere gives us breathing room. And denies the gremlins the metalized atmosphere that is necessary for the operation of their planetary parabolic terror weapons.

- 22.  *Mirjana Gordon* says:
[May 16, 2016 at 8:47 pm](#)

Dane- your many years of efforts are paying off. Soon nobody can hide and ignore this terrible truth.

Welcome to our brave Lawyers, respected professionals that we so desperately need.

23.  *David Haddon* says:
[May 16, 2016 at 8:36 pm](#)

Dane, I just got home from work and I can hardly wait for morning to come! I will call my congressman, Duncan Hunter's office and read to his staff the statements from your legal team. Thanks to you again, also thanks to all of the legal team aswell

[Reply](#)

24.  *Steve* says:
[May 16, 2016 at 7:58 pm](#)

Dane, this is such good news from the brave, legal team. The time has come to stand up to the MIC and stop the madness in our skies. What were once beautiful bluebird sky's in Eugene and Central Oregon are now and have been for decades washed out, poisonous grey skies. The spraying starts in the morning and by the afternoon all is obscured and depressing. Like we have no say in the matter. How can pilots year after year spray these toxic poisons ruining our soil, water and oceans. It's crazy. Thank you for your bravery and devotion to the planet.

[Reply](#)

- o  *JillR* says:
[May 17, 2016 at 7:21 am](#)

Hi Steve, I'm over in Florence and spend time in Eugene and see it too. I've done photo montages of the planes and trails and sent to Oregon's politicians and department of environmental quality with ZERO replies. At least I got replies from WA states environmental people. They even admitted they knew about the programs, but as they are federal there's nothing the state can do about it, but to keep sending photos as they're obligated to send them up the ladder. So I do. Today May 17 is dawning beautiful and clear so we'll see how long it lasts. 😊

25.  *bija* says:
[May 16, 2016 at 7:58 pm](#)

It is so important to our cause and our psyche to have this amazing and courageous legal team in place and now ready to take this battle to the courts and the media. Even though each and every one of us who are awake have been spreading the word as best we can in our own spheres of influence, I fear we cannot make the necessary difference without this official legal surge. Although this is still a tremendous uphill battle, reading each of the attorney's bios gave me such hope! Dane and team, there are no words to adequately express gratitude in the face of such selfless service to our dying planet!

Heartfelt thanks to all of you and your contributions here!

[Reply](#)

27.  *Rachel Robson* says:
[May 16, 2016 at 7:01 pm](#)

Dane, What an astounding team of lawyers you have gathered in this storm, long promised, now introduced! These fine men and woman seem a dream team and are bound to garner the attention you and we want for this most dire issue. This does indeed raise morale and hope. No matter what happens, as you say, this will broaden our horizons, it will get coverage, and if anyone can make a dent, this team can! Much thanks to you, though you would say, humbly, that we are all to thank and indeed these pro bono legal guns are heroic as well, however, without you, this would never have happened. Surely you must know this and it must give you some satisfaction to see this dream come true. Thank you Dane for your tireless courage and persistence, and thanks to your family for supporting you in your efforts and to your entire team at GW. "Dreams" do come true-if one stays the course as you have done and it can't have been easy. Did you ever imagine when you were younger that some day you'd lead such an effort on behalf of not only yourself but oh so many others? It is as if you were born for this. Know that many will rest happily tonight, if only to relish this historic moment.

Congratulations, and thank you so very much! Yours, Rachel

[Reply](#)

- o  *Dennie* says:
[May 16, 2016 at 9:44 pm](#)

There is no real rest until the cloud banks containing mountains of toxic metals and god-only-knows-what STOP raining down on us and the Earth is healed. I can't get any rest when every single breath I take is contaminated, feels like cold sandpaper and I can taste and at times even chew what I'm breathing.

Back in 1967, when I was turning ten years old and imaging what my life would be like in forty years, I never could have imagined that my future would be so ugly. More and more I find myself wishing I'd never been born.

- o  *Rachel Robson* says:
[May 17, 2016 at 3:52 pm](#)

Dennie, but of course! Goes without saying. But, having two entire nights of no sleep at all, I very much needed some and got some. As well as something of a fresh start. When I was ten, I was actually dying, nearly a year in isolation because of my condition. But, finally I pulled through. I've nearly died many times and have very serious health issues separate from geoengineering. Such that geoengineering is like the icing on the cake of my demise. But, even so I find life precious, no matter what. I cannot imagine wishing I'd never been born! Despite my issues, I've had such an interesting life, such an exciting and full life, and I intend to have more! Against all odds.

28.  *Greg O.* says:
[May 16, 2016 at 6:41 pm](#)

Thank-you legal team and thank-you Dane!! This is the boost all of us needed out in the trenches. Onward we go, together in this most critical battle. The truth and the light shall prevail. It is an honor to share this challenging journey with all of you!

Is there any way to sign on to a class action?

I'll be happy to add my name to any lists or petitions

[Reply](#)

o  *Dane Wigington* says:
[May 16, 2016 at 9:16 pm](#)

Hello Kim, thank you for your willingness to make your voice heard in the legal action effort. Due to the nature of the filing, we are trying to stick with plaintiffs from central or Northern California. If you are in those categories, let me know.

o  *Dennie* says:
[May 16, 2016 at 9:52 pm](#)

I'm one. You can sign me on. I have serum barium tests and hospital admissions records attesting to my acute barium poisoning.

Sometimes I think I'd like to live long enough to see geoengineering and other massive environmentally destructive crimes come to a complete halt and don't know if we ever will because so many are turning such a nice profit from killing everything, but I'd certainly like to live long enough to see the Powers That Shouldn't Be thrown behind bars, chained to the walls wrists and ankles, then see the keys to their cages melted down. Or at least put them somewhere where they have to do Community Service 24/7/365, building housing for all the people that their sick money system has turned out and ruined, plow the fields and grow organic food for the poor, all by hand. Make "Them" walk, ride bikes or the bus, every last place they go. They need to learn to do without. Or better, just LEAVE this time and space dimension. Forever. NO returning/reincarnating here, either.

o  *JJ* says:
[May 18, 2016 at 1:12 am](#)

Thank you for getting this together Dane and for your tireless perseverance! I live in Northern California and you are welcome to call on me to testify. Test me for toxic levels etc etc... I have thousands of photos from the constant spraying and am ready anytime. I'm the Jason you met at the Redding Conference.

- o  *Dane Wigington* says:
[May 18, 2016 at 8:04 am](#)

Hello Jason, thanks for your willingness to stand with the legal effort.

- o  *Rachel Robson* says:
[May 18, 2016 at 1:36 pm](#)

@Dennie, thanks to you, I will ask if I can have a serum test for barium!

30.  *donna ford* says:
[May 16, 2016 at 6:22 pm](#)

Thank you all for the work you are doing to save Mother Earth. You are heroes one and all and there is a special place in heaven for you, of that I am sure.

[Reply](#)

31.  *Diane Friday* says:
[May 16, 2016 at 5:56 pm](#)

From the bottom of my heart, a million thanks to you Dane, and to every member of the legal team. Thank you for all you've done, all you're doing, and all you're about to do. This is indeed what we all needed to boost our morale and energize us to go on fighting as long as it takes. As a former legal secretary, seeing the words "60-Day Notice" gave me chills. Good chills. You're all about to make history here. If there's anything specific we can do, apart from continuing to try and wake people up to this hard-to-stomach reality, please say so. I have a Pinterest board entitled "Geoengineering Observations" with a link to this site. I've been adding my own photos just the last few days, because the majority of the month has been overcast and raining and the photo ops have been few. Please feel free to take any of those photos (and descriptions) if they can be of any use.
Again, thank you, and blessings to all of you.

[Reply](#)

32.  *Richard Bernier* says:
[May 16, 2016 at 5:48 pm](#)

Congratulations to you Dane and all the team of attorneys and activists working together to stop the geoengineering destruction of all life on this planet. Do you know Dane if the legal action you have filed in Canada is starting to reach the media down here? Thanks again for all you have done to alert people and stop this mad agenda.

[Reply](#)

33.  *james* says:
[May 16, 2016 at 4:45 pm](#)

Thank-you Dane this is exciting news! I have been trying to wake people up for years. It has been cold and overcast in Southern California for the past several days. Last week a strange large dark grey cloud hovered over the mountains, it looked like something was on fire, but nothing was. Something has changed in the composition of the Chem trails and is slowly being

introduced. I have never seen weather like this in Southern California in May!! I keep the windows closed as if they are open I get a cough and cough up a phlegm after a day or two. I support your efforts 100%. I will continue to notify everyone I can.

[Reply](#)

34.  *Carl F Rollberg* says:
[May 16, 2016 at 4:33 pm](#)

Great job Mr Wigington! I'm not commenting jut about the legal team. You provide valuable information for us to use. I tell newly interested people to start their research with you. By the way, you are very talented when it comes to public speaking. You remind me of Kevin Kostner in JFK. I feel we are really running out of time. If we are facing death, it means we die fighting or stop this deadly action in our skies.

35.  *Jan* says:
[May 16, 2016 at 4:08 pm](#)

Great news. What fantastic people you all are. This has cheered me up no end. Particularly after the skies over Dublin (Ireland) yesterday....and that spraying was "mild" compared to other places in this world.

[Reply](#)

36.  *Michael* says:
[May 16, 2016 at 3:51 pm](#)

Thanks for such a rapid response Dane. For most of the week the skies were only lightly tampered with,although there were snow flurries here in Michigan yesterday. Right now they are in full swing and the skies look like an inverted version of the old game,Pick Up Sticks. P. S. got to 66 degrees today.

[Reply](#)

37.  *Lingo* says:
[May 16, 2016 at 3:50 pm](#)

My heartfelt thanks to you and these lawyers who have entered into this arena. I for one appreciate their sacrifice. I fear that this may end their careers or destroy families and so I offer a humble prayer that it does not. Please let them know that thousands stand behind them across the globe in other countries for this is a horrible crime to all life on earth. When it comes to the notice I hope it is made publicly for all to see. Also, I hope academia and environmental groups also get put on notice for their total abandonment of the life on this planet over this blatant crime that is taking place. Strength and courage going forward!

[Reply](#)

38.  *Michael* says:
[May 16, 2016 at 3:12 pm](#)

Don't mean to sound like the glass is half empty,but one begs to think about how many times Lawyers for the Defense will seek to adjourn this critical litigation. Nothing at this point would surprise me. I'm more than sure that the enemy is well aware of this movement of ours and have

a plan of denial and defense. If this ever manages to climb all the way to the Supreme "Kangaroo" Court,,,,,, We'd all be best served if a Liberal judge was not appointed. God help us in any case. Respectfully submitted,, Mike

[Reply](#)

- o  *Dane Wigington* says:
[May 16, 2016 at 3:36 pm](#)

Hello Michael, as stated in the Legal team post, no matter what road blocks defense attorneys try to throw up, it is reaching a critical mass of public awareness that matters. The credible legal action is essential, and the facts we have to prove the toxic heavy metal contamination cannot be disputed or excused. Lets all keep our stride, no one can be spared from the front lines of this most critical battle.

- o  *Rachel Robson* says:
[May 17, 2016 at 10:53 am](#)

Oh good grief Michael! Rain on our parade why don't you?! My family's efforts in a murder trial hit a dead end from defense owing to a plea bargain. While the person in question did not commit the crime, in my opinion, she is, I'm sure, a witness, and so now can never testify owing to double jeopardy. I tried a "hail Mary pass" by pleading to the judge to drop the charges against her, but was unsuccessful. The fault was in part owing to the police jumping the gun, running on rumor, as well as lousy lawyers and a difficult state. But, the case itself is not solved and so, after a breather, I am beginning another tact, having paid for court documents, having done "leg work" on computer and putting the two together, we now know who did it. So, starting over from scratch and nervous about it. But, the main thing is, I Never Ever give up. By contrast, the legal team assembled here is remarkable in everyway. Remarkable for their long experience and advanced education, remarkable for their commitment to Earth and all upon her, remarkable for their bravery risking reputation and livelihood for GW and the puzzle pieces Dane has meticulously put together. If this is thwarted, we will start over again. At the very least there Will be media attention and a much greater audience reached. Those who scoffed at us "nut cases" will have to admire this very fine team, turning their blind eyes toward what they could not, would not see before. No one believes this government of ours will just roll over saying mea culpa. Of course they will do everything they can to stop this, of course. That is not the point. Millions of peoples around the world are aware. Millions more will finally have the guts to speak out, knowing they are in good company. My God man, can you not see the upside? Let's not fast forward to the judge yet. There is still much to be done. Can we not revel in a bit of celebration? I am.

[Reply](#)

41.  *Inez Maria Pandit, MD* says:

[May 16, 2016 at 1:08 pm](#)

Dear Dane, Dear Legal Team and Dear International Friends!

I would like to thank all of you for your great work and courage and dedication to bring about the truth!

It is outrageous to watch what is going on in the skies above us here in May in the west lower Rhine region of Germany. For the past two weeks we have been grilled with above normal temperatures and intense sun radiation without any rain. The relative air humidity has been very low, like desert conditions. Now it has become cold and windy without any precipitation. The farmers have to spray water on the fields, and we have to water our gardens on a daily basis merely to keep plants alive. Health effects on humans and animals are obvious. We all are suffering from nanoparticles from aerosol spraying, especially aluminium as well as glyphosate in water and food. All of this is brought to its lethal potential by electromagnetic fields from various sources.

Despite all this: Let us strive for the truth, the beauty and the goodness in life and on the planet earth!

Love.

Inez

I'd like to know WHERE are the Physicians for Social Responsibility in this mess??

My new private viola student is an Australian-educated M.D. She agrees that The First Step in healing your patients is to do no harm. That includes STOPPING THE POISONING of Planet Earth, stopping all radionuclide production and games, stopping all poisonous crap and cutting it out. Don't prescribe poisons, either. And I say, teaching the kiddies that Mommy doesn't live here any more and they had better clean up the messes they've made. And NOT MAKE ANY MORE MESSSES THAT CAN'T BE CLEANED UP— OR ELSE!!!!!!!

If I were The Mother of Everything I'd come down here as a MASSIVELY DESTRUCTIVE WIND that literally blows away ALL of the Evil-Doers and anything that comes from them. ALL OF IT, gone. Scrub the planet of their evil presence. Then put new locks on all the ways "they" have gotten here or could possibly still get back. Change the Cosmic Locks. Then quarantine the fothermuckers until God Himself is good and ready to decide exactly what to do with this impossibly corrosive Cosmic detritus. About all I have left is my imagination, but then again, what did Einstein have to say about that?

- o  *Rachel Robson* says:
[May 17, 2016 at 11:16 am](#)

Dear Inez, It is so good to hear you on this site. A frequent contributor from your country recently posted photos of your skies and they were hellish! We need as many doctors as possible to raise people's awareness of how damaging the toxins from geoengineering are as well as electromagnetic all. Not to mention nuclear. Is there a physicians' group worldwide that can make international statements of these harms to not only humans and all life, but Earth herself? Physicians here will not touch this issue with a ten foot pole. An expression, but surely there must be some consensus among physicians regarding these well known harms so great as to spell doom. What do your colleagues think? I'm thinking there should be an international coalition of physicians to speak out in unison, taking a stand. Do you think this is possible?

42.  *Rhonda* says:
[May 16, 2016 at 12:46 pm](#)

Dane,

This is the kind of news that gives me tremendous hope that the tide will change. I'm so glad that you and your team has been able to gather the copious amounts of evidence to this crime against this planet.

Thank you so much for all your efforts, please know that there are many people across the nation that are aware and trying to raise awareness.

Rhonda in Michigan

Another note while I am able to post at the library:

We are very concerned about the continuing proliferation of painted-over cargo containers hauled by trucks in the southwest. They are, at times, the majority of loads in transit. They all bear the same lousy paint quality – always a dirty white, with logos of former owners faintly visible (e.g. Knight, CFE). Despite opposing the war, being a draft dodger and a concert pianist, my husband found himself on the front lines of Viet Nam as a point man and ever since has remained remarkably observant of his surroundings. Neither of us has ever seen such cargo paint-overs before. The most concerning aspect, as this combat veteran knows, is what is aboard these trucks. For about a year ago some 2.2 billion 50 caliber hollow point rounds were requisitioned by the federal authorities. It would have taken a lot of time to produce them, pack them and distribute them. Each 50 caliber round might weigh around one half pound. Loads of them would be extremely weighty and massive, requiring a lot of packing materials. The weapons too are very large, of a length about the height of most men. The older models were extremely heavy, and while it's possible they're made of lighter materials they would nevertheless require much shipping volume. So we're looking at 1.1 billion pounds of ammunition alone. It would take a lot of trucks and time to distribute such arms. Is this what is inside these cargo containers? If not, what is it?

horsegirl, thank you so much for your observations (and your husband's). I hope that if anyone else reading this notices anything that might be relevant in their area, they will inform us.

44. [horsegirl](#) says:

[May 16, 2016 at 12:23 pm](#)

@ Marc –

While this is for everyone, I wanted to respond to your spectacularly phrased critique of the "geoscatologists" employed to destroy our planet. I might have misread somewhat, but you entertain the question of whether they think they are helping our planet and all life on it.

While most are aware of the publication of *Owning the Weather by 2025* - a published artifact of statecraft presented to the Air Force in 1996 – I want to thank Josefina Fraile Martin of Spain, whose excellent open letter to the US military I have read and assisted in its translation. Josefina, as well as a poetic and powerful writer, has taken the time to read every single published paper about geoengineering over the decades, as her article notes. In all of them she failed to find a single sentence (let alone paragraph) treating of the welfare of either the planet or any living creature on it – most notably the human race. Nor, in OTW 2025, does a search turn up any form of mention of CO2/carbon dioxide, nor global warming, nor climate change in the sense of concern with planetary well-being. On the contrary, one particular paragraph illustrates the intention and crass greed which solely motivates these fiends. For any still toying with the possibility that there exists any benevolent purpose to climate engineering, a look at the document should lay such misprision to rest. On page 27 the possibility of an artificial climate is contemplated as published in 1996:

Nanotechnology also offers possibilities for creating simulated weather. A cloud, or several clouds, of microscopic computer particles, all communicating with each other and with a larger control system could provide tremendous capability. Interconnected, atmospherically buoyant, and having navigation capability in three dimensions, such clouds could be designed to have a wide-range of properties. They might exclusively block optical sensors or could adjust to become impermeable to other surveillance methods. They could also provide an atmospheric electrical potential difference, which otherwise might not exist, to achieve precisely aimed and timed lightning strikes. Even if power levels achieved were insufficient to be an effective strike weapon, the potential for psychological operations in many situations could be fantastic.

And the motives?

One major advantage of using simulated weather to achieve a desired effect is that unlike other approaches, it makes what are otherwise the results of deliberate actions appear to be the consequences of natural weather phenomena. In addition, it is potentially relatively inexpensive to do. According to J. Storrs Hall, a scientist at Rutgers University conducting research on nanotechnology, production costs of these nanoparticles could be about the same price per pound as potatoes.

snip

A high-risk, high-reward endeavor, weather-modification offers a dilemma not unlike the splitting of the atom. While some segments of society will always be reluctant to examine controversial issues such as weather-modification, the tremendous military capabilities that could result from this field are ignored at our own peril.

The motivation exists. The potential benefits and power are extremely lucrative and alluring for those who have the resources to develop it.

If anyone clings to any illusions that these programs ever had beneficial origins, a careful read through the entirety of *Owning the Weather by 2025* should put such notions to rest. They are clearly far ahead of schedule. The document can easily be searched online.

Horsegirl: This is tremendous information and thank you for the informative post. Why am I not surprised by all of it. The agenda of the mad psychos in power has been evident for years, were we astute and alert. We need to hang together and make all of this known, as Dane keeps pushing us to do.

Good luck to you.

- o  Diane Friday says:
[May 16, 2016 at 5:43 pm](#)

horsegirl: Thank you so much for taking the time to find those extremely relevant segments of OTW 2025. I've not had the time to read as much of it as I should have, but I'd printed out and read some of it years ago, not long after being made aware of what was going on in our skies. One would think those excerpts alone would make the coming litigation a slam-dunk case, and in a sane world, that would be true. Of course, in a sane world, such a document wouldn't exist and none of this would be happening. I never imagined, when I first found that little manifesto all those years ago, that it would get this bad. It seems "they" spent years trying to be as stealthy as possible, perhaps until the necessary technology existed to make the current atrocities possible.

Again, thank you for taking the time to share those incredibly pertinent excerpts.

- o  *Jenny* says:
[May 17, 2016 at 5:15 pm](#)

How disgusting, the "motives" part. TBH, any time I read of some earthquake, fish die-off, drought, extreme weather event, etc. nowadays, I wonder if our own government had something to do with it. I used to be afraid of "the Russians" when I was a kid.

Nowadays I'm more afraid of some in the upper reaches of our own government /military/secret agencies than I ever was of "the Russians". That (what I am afraid of) includes, of course, whatever international cabal is involved in the NWO agenda. I feel terrible when I think of my kids' future.

BTW, some of the faux clouds I noticed yesterday looked different. I can't really describe them, but they looked closer to real clouds yet looked on the edges like they'd spread out from a line initially. Wondering if anyone else noticed anything. I didn't go outside today so nothing to report from today's skies.

Again, many thanks, horsegirl, for this info. And of course thank you to Dane, for everything.

- o  *Marc* says:
[May 18, 2016 at 4:35 am](#)

Hello Horsegirl, nice to hear from you. Anyone who has read any of my rants previous to this one has probably figured out that I am under no delusions regarding the motives behind geoengineering. In fact, the majority of my observations have always leaned heavily toward sinister motives of unspeakable darkness. But, as Dane so often reminds us, it is not this or that. It is an array of motives and objectives. But I'll grant you this: NONE of them are benevolent.

45.  *horsegirl* says:
[May 16, 2016 at 12:16 pm](#)

To Dane and the legal team, our deepest gratitude for your courage, dedication and excellence. Know that you are bathed in the prayer of thousands of sincere people. Take heart.

53. *Ben* says:

[May 16, 2016 at 9:53 am](#)

It is an interesting thing to see science as a democratic process. “When Dane began to note massive losses in his home's solar power uptake due to solar obscuration (the blocking of the sun from the ever more aggressive and obvious jet aircraft spraying of atmospheric particulates), he began constant research, lab testing, and reporting on the climate engineering/solar radiation management issue.” The federal government promotes solar energy as an alternative to carbon fuels and yet makes the energy system less viable with Geoengineering practices, solar radiation management. These actions may be seen as a compromise between needs or democracy with in science policy and practice, but science is not really a democratic process, it is a process of discovery and often either something works or it does not work. You cannot promote a clean energy system and then make it ineffective with a dirty system, because people will have to continue the use of carbon fuels which will create more of a need for Geoengineering. Something has to stop to break the cycle. We need to quickly move away from carbon fuels so that we can stop aerial spraying and allow solar energy systems to function well. Of course there are many clean ways to generate energy and we can use all of them.

[May 16, 2016 at 8:38 am](#)

I live in Brentwood Long Island NY. And on Saturday may 14 I was outside, on the back deck with my client that I take care of. And we were looking at clouds. And saying how the look like big cotton balls, all the clouds were heading in the west direction. So we sat and watch them for like fifteen minutes. And then we saw two planes go by spraying one had the long trail behind it and the other had the short trail but they were going in the same direction. Suddenly the clouds started moving backwards going east. I was stun to see that I actually caught them doing it. I'm trying very hard to alert people but they think I'm nuts but I'm not ready to give up until we put a stop to this.

God bless these wonderful attorneys and the geoengineering watch group. This HAS to stop!

Thank you for all you do!

[Reply](#)

66.  *Dave* says:
[May 16, 2016 at 8:24 am](#)

Great news! I was wondering as I listen to Ralph Nader once in a while if he is fully aware of SRM/SAG and how greatly his organization could help in the legal effort, and sounding the alarm. Much thanks to the legal team and of course, Dane. When the spirit moves prayers, are offered for the activists and now the legal teams, God bless all.

[Reply](#)

[May 16, 2016 at 8:23 am](#)

Dane Wigington, James T. Grant, Robert L. Wegman, Petra Brokken, William Blackwell, Joseph H. Marman, Edward A Strenkowski, and all others on the legal team – my sincere thank you for the hundreds of hours spent so far helping to formulate and ensure a solid case will be filed and represented, with the goal of bringing the covert and illegal geoengineering programs (solar radiation management, and more) to a halt. There are many of us who are grateful to see and support your efforts, and share this end goal.

[Reply](#)

THANKS Cori...!

68.  *L* says:
[May 16, 2016 at 8:18 am](#)

This is wonderful news. My deepest and most heartfelt thanks and gratitude go to all of you wonderful, brave, noble people. May you be victorious!

[Reply](#)

69.  *Abigail* says:
[May 16, 2016 at 8:12 am](#)

Saying, 'Thank you', is not sufficient. You, Dane, have gone past the call of duty. I stand amazed at your intelligence and relentless work to get all of this posted for, we the people, to see and share. Sharing this with Russ Tanner's OrbisVitae. God bless you and your family. THANK YOU to all of the Anti-Geoengineering Legal Team! HAPPILY AMAZED and PROUD to be an AMERICAN. This too shall pass. BLESSINGS!

[Reply](#)

o  *Dane Wigington* says:
[May 16, 2016 at 8:31 am](#)

Hello Abigail, it is a team effort, all of us need to keep our strides in the battle at this most critical hour. The continued work of activists raising awareness in the field is critically important to the overall effort. Lets all keep effectively and efficiently sounding the alarm.

70.  *virginia* says:
[May 16, 2016 at 8:05 am](#)

Dane: Your presentation of today is a shot in the arm we all needed, IMO. With such a

distinguished and impressive legal team who have the commitment to exert so much time and effort to tackle climate engineering, it brings to all of us new hope and a new resolve to fight harder than ever to expose the murder of our planet by our government.

To all of you brave legal warriors, I give my utmost thanks and appreciation and best wishes for a successful resolution to our cause.

To Dane, our respect and gratitude.

[Reply](#)

71. *Sean Slavin* says:

[May 16, 2016 at 8:04 am](#)

To the men and women who are part of the legal team, thank you.

[Reply](#)

72. *Susan Ferguson* says:

[May 16, 2016 at 8:03 am](#)

Dane — CONGRATULATIONS! I will send this out to everyone I know. This is a monumental step in the fight. On we go! God Bless you for your tenacity and courage.

[Reply](#)

o *Dane Wigington* says:

[May 16, 2016 at 8:34 am](#)

Hello Susan, the attorneys deserve all the gratitude we can give them, they have all shown profound courage and dedication to the common good.

Dane Wigington geoengineeringwatch.org From the endless skies above to the vast ocean expanses, the climate engineers have been busy modifying the natural world with highly toxic elements

o

[Stopping Climate Engineering, Breaking Down The Denial](#)

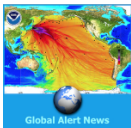

Dane Wigington geoengineeringwatch.org Those in power have spent decades programming the public to accept the constant spraying of our skies. They have taken every imaginable measure to

o

[More Mass Failure Of Geoengineering, Ocean Fertilization Can't Work](#)

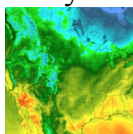

Dane Wigington geoengineeringwatch.org Man's war with nature is ultimately a war against himself. How many "interventions gone wrong" will have to occur before the lesson is finally

o

[Geoengineering Watch Global Alert News, March 12, 2016](#)

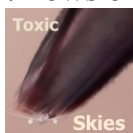

I just made a trip to the California State capital to distribute boxes of geoengineering awareness materials (magazine copies, commercial DVDs, and color glossy flyers) to every

o

[Climate Engineering, Final Fatal Folly Of The Human Race](#)

Dane Wigington geoengineeringwatch.org Planet Earth, and all that live on it, are in the throws of unimaginable and immediate upheavals. Even at this late hour, with the

o

[Irrefutable Film Footage Of Climate Engineering Aerosol Spraying](#)

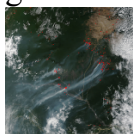

The geoengineers continue to ramp up their ongoing aerial bombardment of planet Earth. In order to wake up the sleeping masses to the war being waged

o

[Geoengineering Watch Global Alert News, March 5, 2016](#)

The darkening horizon is fueling ever more desperate denial in populations around the globe. The majority of the masses are clinging tenaciously to a reality that

o

[Climate Engineering Mayhem Continues To Take Its Toll](#)

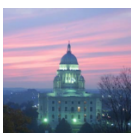

Dane Wigington geoengineeringwatch.org The unraveling of Earth's life support systems continues to accelerate all over the globe. Devastating droughts, highly destructive deluges, record forest fires, and completely engineered snowstorms,

o

[Total Climate Control Captured On Satellite Images](#)

Dane Wigington geoengineeringwatch.org The radar loop film footage in the 6 minute video below is an exceptional documentation of the total climate control that is being inflicted on

o

[Anti-Geoengineering Legislation In Rhode Island Is Still Alive](#)

Dane Wigington geoengineeringwatch.org Rhode Island State representatives are showing a level of morality and courage that has so far been lacking from all other states. Representatives of

o

[Geoengineering Watch Global Alert News, February 27, 2016](#)

Dane Wigington geoengineeringwatch.org The siege of planet Earth and the web of life continues on all fronts. All the while the delusion of perpetual growth on a finite

o

[Climate Engineering Denial And Deception, Holding Mainstream Media Accountable](#)

Dane Wigington geoengineeringwatch.org Should we consider it acceptable for mainstream media news anchors and their "chief meteorologists" to completely ignore and marginalize the legitimate and verifiable concerns

o

[Meteorologists And Climate Engineering Denial, Perpetuating The Lie For A Paycheck And A Pension](#)

How expansive and deep is the cancer of payed denial and deception which has long since permeated so much of the science community on countless fronts?

o

[Geoengineering Watch Global Alert News, February 20, 2016](#)

Modern industrialized society has been incredibly well trained to revere certain circles in our society. Trained to follow their dictates without question. The science and mainstream

o

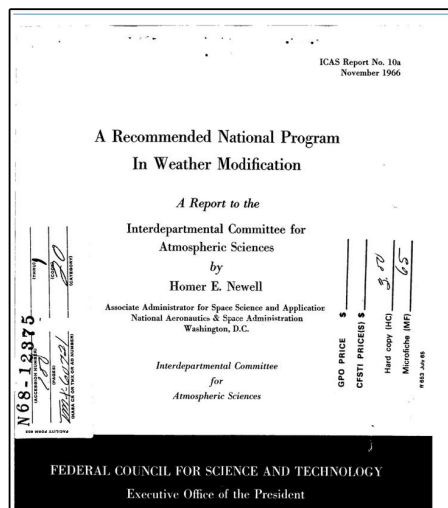

[Climate Engineering: Programming Public Acceptance While The Planet Is Decimated](#)

How many individuals in our society have completely abandoned any sense of honor or morality? How many have sold out to the cancer that currently controls the
