Passive Vaccine Storage Device

A device that can radically change the ability of medical personnel in developing nations to deliver functional vaccines.

[Learn about our involvement >](#)

Millions of people suffer and die each year in developing countries from causes that humanity has the scientific and technical ability to solve. Global Good is a collaborative effort between Bill Gates and Intellectual Ventures to address this. We take on some of humanity's toughest problems through the power of invention by drawing on resources normally reserved for commercial pursuits in the developed world.

Global Good combines IV's unique invention prowess with the expertise of leading humanitarian organizations, forward-looking governments, and commercial partners that share our vision. Together, we invent, develop, and deploy commercially-viable technologies that improve life in developing countries.

NEWS & ARTICLES

IV's Best Nine of 2016:
Nine Pictures Worth 9,000 Words

As 2016 comes to a close, we're depicting the year of ideas, inspiration and invention through nine of our favorite pictures that were taken at just the right moment in time. Because while the world of invention propels us forward quickly, it's important to remember the milestones of progress that helped us get where we are today.

Top 16 Invention Stories That Had You Talking in 2016

OUR WORK

Disease Modeling

Vaccine Logistics

It is in this space – where idealism meets ideas – that the magic of invention is brought to life. And as we look back on the 2016

Before you can
eradicate a disease,
you have to
understand how it
spreads.

Vector Management
New tools in the fight
against vector-borne
diseases.

Agricultural
Productivity
Working to improve
food hygiene and
transportation.

Strengthening and
extending vaccine
service over the last
mile.

Malaria & TB
Diagnostics
Saving lives through
rapid, accurate
diagnosis of diseases.

inventions created around
the world, and within our own
walls at IV, we find inventors
who pictured a better world
and found a solution to
make it happen.

Global Good Fund, the
Feinstein Institute and
Sanguistat Announce New
Bioelectronic Treatment
Initia

The Global Good Fund, The
Feinstein Institute for
Medical Research at
Northwell Health and
Sanguistat, Inc, are
partnering on clinical trials of
the Neural Tourniquet to
evaluate the efficacy of
bioelectronic medicine in
treating blood loss
associated with postpartum
hemorrhage.

Patents for Humanity:
Global Good's Passive
Vaccine Storage Device,
Arktek, wins USPTO
Award

Through its Patents for
Humanity Award, the United
States Patent and
Trademark Office (USPTO)
illuminates stories of
technologies that are making
real change in the world for
those most in need. This
year, one of those stories is
ours to tell.

Photo Essay: Vaccine
Access in Ethiopia's
Remote Danakil Desert

Last summer a team from
Global Good returned to a
remote health post in
northeastern Ethiopia to
observe how one of our
products – the Arktek™ – is
helping people in the region
to access vaccines.
