

Weather Modification

Advanced Materials for Atmospheric and Environmental Technologies

American Elements manufactures numerous products for customers in the weather modification and environmental science industries including nucleating agents, tracers, and other advanced materials. Applications include cloud seeding, storm prevention, anti-hail, meteorological support services, and environmental monitoring.

American Elements maintains industrial scale production for all its cloud seeding and weather modification materials. Additionally, we provide customer guidance on topics such as the selection of appropriate materials for aerial and ground-based cloud seeding, trace gas detection, chemical formulation and material safety data.

Selected Products Supplied to the Weather Modification Industry

TODAY'S SCIENCE POST™ !

January 15, 2019
Los Angeles, CA

Each business day American Elements' scientists & engineers post their choice for the most exciting materials science news of the day

Automation eliminated a key bottleneck when producing plutonium-238
