

Monique Sené

From Wikipedia, the free encyclopedia

Monique Sené (née Moirez^[1]) is a nuclear physicist and one of the co-founders of the *Groupeement des scientifiques pour l'information sur l'énergie nucléaire* (GSIEN) (Association of Scientists for Information on Nuclear Energy) and its first president.^[2] As of March 2011 she was Honorary Research Director at the National Centre for Scientific Research and president of GSIEN.^[3] She is also Vice President of the Science Committee of *Association Nationale des Comités et Commissions Locales d'Information* (ANCCLI) (National Association of Local Information Committees and Commissions)^[4] and a member of ANCCLI's *Haut comité pour la transparence et l'information sur la sécurité nucléaire* (High Committee for Transparency and Information on Nuclear Safety).^{[3][5]}

Although she is not an opponent of nuclear power *per se*, Sené is a high-profile critic of the French nuclear power programme due to concerns about its safety, the handling of nuclear waste and its imposition without public debate.^[6] She worked on high energy physics at the École Polytechnique at the time of GSIEN's foundation.^[7]

In 1998 Monique was awarded the rank of Chevalier of the National Order of the Legion of Honour for her work.^{[1][8][9]}
